A Note Regarding FY03 DSIN Legislative and Grant Request Table of Contents

Note – Pages of the FY03 DSIN Legislative & Grant Request do not correspond to the various pages of text that have been excerpted from other included official documents. For example the following document:

“Intergovernmental Relations – Assembly of Delegates at the Institute for Government Innovations 2002 – John F. Kennedy School of Government at Harvard University

Next Level Spy Craft – A Never Before Seen Portrait...”

begins on approximately page 31 of the Legislative & Grant Request and has its own table of contents. Page numbers included within the “Intergovernmental Relations” document correspond only with the “Intergovernmental Relations” document and not the page numbers listed at the bottom of each page of the Legislative & Grant Request.

If the enclosed, individual, documents, which denote their own table of contents and page numbers, are removed, as separate from the Legislative & Grant Request, the individual documents’ page numbers will correspond to their respective table of contents.

*The Most Compelling Fight – The Continuing Commitment – U.S. DSI/N
Secrecy is Golden is Forever Sacred – We Live as Monks Bestowed*

DSIN Official Secrets Act serves as a code of honor by sworn oath based on the Assistant Chief of Staff's memo to the Chief of Staff for G-2 Army Intelligence (C)

March 26, 1938 “to maintain and operate in time of peace under strictest provisions to insure secrecy.”

Other Laws with which DSIN Operates Accordingly are as Follows:

National Security Act of 1947
Federal Advisory Committee Act
Homeland Security Guidelines
Patriot Act of 2001/2
U.S.C. (United States Code)
DSI/N Maintained DoD/ Pentagon Charter
DoD Directive 1400.35/ Defense Civilian Personnel System (DCIPS) 19 March 1999 which is responsible for the establishment of the Defense Civilian Intelligence Board (DCIB)
Section 6 of Public Law 86-36
President Reagan’s 1981 Executive Order 12333
Existing co-op with private sector “interests” worldwide for operational security
22. U.S.C. 2656 and the Federal Advisory Committee Act, a) amended 15 U.S.C. app.)
The Overseas Security Advisory Council (OSAC) promotes these mutual interests

“Some say intelligence gatherers or spies come from the most unlikely backgrounds, and I guess that applies to me. Throughout history you will see men and women from many backgrounds step forward to serve their country in this particular way, and I was no exception.”

Words by Nathan Hale from CIA website:
<http://www.cia.gov/cia/ciakids/history/nathan.html>

Official Briefing on 16th U.S. Defense Agency Creation:

Previously, portions of this congressional budget call had together served as an official DSIN disclosure of the service’s legal intent to become the 16th U.S. Defense Agency in an official briefing to the President and Vice President of the United States, Congress, and every Executive leader and major department in the national hierarchy. To this end, DSI/N has notified the White House, the State Department, FBI, FBI Counterintelligence, the Justice Department, Department of Defense, CIA, NSA, the entire Intelligence Community and the Office of Inspectors General. In the hypothetical sense, even without Congressional and/ or Presidential approval of 16th U.S. Defense Agency status, the AONN (Access One Network Northwest) U.S. Defense Security Intelligence Network would still legally, technically, and officially under a labyrinth of laws, both clear and obscure, remain as a powerful national intelligence organization. DSI/N is protected under the U.S. Constitution by the powers of the United States and for good reasons. If you are a star attorney and wish to apply for service to defend such perpetual legislation, do not hesitate to contact DSI/N Human Resources and your/ our

Congressional proponents. Once again, AONN U.S. Defense Security Intelligence Network (DSIN) is an advanced national defense security intelligence organization.

Profoundly Intelligent (Meta High-IQ) Defense Security Special Access Programs/ Operations (PID2SA)

And the Truth Shall Set You Free...

Case in Point:

As brought to the domain of public knowledge by intelligence expert, Jeffrey T. Richelson, in III Title: United States intelligence community,

ISBN 0-8133-2376-2 © 1995 (Boulder, Colorado USA and United Kingdom by Westview Press/ Cumnor Hill, Oxford),

there are in reality, multiple intelligence communities and not simply one. So for one to better understand our interrelationships, we are an intelligence community, which consists of intelligence officers and armed forces personnel culled from among various government agencies and military components. Yes, it would also be fair to say that we are also a defense, security and intelligence community. DSIN combines the concepts of National Intelligence Organizations, Defense Department Intelligence Organizations and Military Service Intelligence Organizations in ways that our predecessors have only dreamed of. DSI/N takes much credit for this, as multi-agency cooperation has been the crux of U.S. intelligence since the beginning. Our clandestine service fought, almost beyond imagination, to enforce reform throughout government, the United States and world as a whole.

The Assistant Secretary of Defense (ASD) issued a directive for all military components to create a single unified intelligence command within their respective organizations...the directive was not followed. U.S. Presidents have issued Executive orders for unified intelligence...agencies have not cooperated effectively...

However, for decades, members of a special intelligence group, AONN DSI/N, has observed, listened, followed instructions and recognized the call to the highest ideal. DSI/N has achieved a level of intelligence that agencies have forever struggled to reach – DSI/N has altogether changed and redesigned U.S. national security doctrine. DSI/N is that special exception to the rules, on-fire-energy that has taken the lead in an often-too-complex-for-most-people, super-bureaucracy. In spite of all the lies, backstabbing, double-crossing, abuses and deceit throughout society, the world, politics and government... the U.S. Defense Security Intelligence Network is a champion organization and knows in large, what is *really* going on.

19 June 2002

**To: Directorate for Information Resources Management,
Office of the Assistant Secretary of Defense (Comptroller)**

CC: NIST

**RE: Pacific Rim Intelligence –
AONN DSI / Access One Network Northwest Theater Operations
U.S. National Defense Security Intelligence Service**

Dear Assistant Secretary of Defense,

AONN DSI has registered with National Archives for upgraded agency status. As a special independent agency, which served as a top supporter of Defense Department trading while identified as 1P0W4 and dually listed under Defense Logistics Agency, DSI/N has ascended to the forefront of U.S. Counterintelligence. DSI/N is now second only to the Office of the National Counterintelligence Executive's roster of top-tier personnel. Moreover, our staff is certain you are well aware that NCIX includes essentially the entire Intelligence Community. Beneath that we have humbly earned our rank as a most noteworthy national defense component.

AONN DSI new national security protocol created at Harvard University John F. Kennedy School of Government for FY 2002/3 has already made history. Approximately three years ago, Defense Contract Management Command (DCMC), which had been a component under Defense Logistics Agency, became autonomous. Decades prior it was NSA and the event that had preceded CSS had obviously been CIA. History is made once again as DSI/N is next in line. Our new joint-CI/CT Strike Force / multi-agency, following in the footsteps of the most reputable predecessor agencies, is the largest, most sophisticated and most compelling entity in our nation's military industrial complex. Working closely with all strata, every conceivable command level and every known sector, our tremendous system of information as well as beyond state of the art intelligence sharing capabilities only serve to strengthen positive relations with CIA/ DIA/ NSA. The DSI/N collective feels that it would be an absolute honor to continue our service to the nation, aforementioned components and DOD command under Special Operations Command. This would be an ideal position as it puts us at the bottom of the totem pole (senior officials will like this notion) in the overall Special Operations Command lineage, but nonetheless provides DOD with the next generation module, which of course is clearly a much needed element. This will reasonably ensure a continued DOD generational cycle. I am certain that DSI/N has CIA/ DIA/ NSA blessings as the respective leadership understands the dire need for the defense security intelligence ideology to continue forth, refresh itself, and offer a new light every couple of decades. Each time this happens, the DOD community grows, the newest agency gets

the “new person on the block” treatment (humor) and nevertheless contributes the next building block to further fortify and increase efficiency of the machine. Again, it would be the greatest honor to delegate one hundred percent of our detachment to your office so that the updated hierarchy will appear as follows:

**Executive Departments
(and their associated organizations)**

- 97EX Inspector General, Office of
- 97BJ Joint Chiefs of Staff, Organization of
- 97CG National Security Agency/Central Security Service
- 97JC Strategic Defense Initiatives Agency
- 97HW Uniformed Services University of the Health Sciences
- 97GZ U.S. Court of Military Appeals
- 97ZS U.S. Special Operations Command
- 97OX AONN Defense Security Intelligence Network/Pacific Rim Theater Operations

... Unique alternative selected autonomously under Public Law is **A1X0**
(Read “A...1...X...Zero”), whereas the preceding “97” series code consists of the letter “O” rather than the number zero

DSI/N has a few options as indicated in FIPS 95-1: “Users may assign their own four-character code, preferably with a letter as the leftmost character to avoid possible conflict with the numerical TAS, or they may forward a written request to NIST, Room B151, Technology Building, Gaithersburg, MD 20899, for a formal assignment of a code.”

DSI/N could provide its own code as autonomous/ interdependent or request that NIST do so, however we would prefer your assignment. It’s a natural progression in DOD structural evolution and we would like for DOD to be excited about this. We are asking Congress for \$50M in 2003 and it is estimated that roughly thirty percent of this will go toward the hiring of top DOD staff. DSI/N is *your* service and your service staff gladly shares in the momentous occasion.

Sincerely,

CIO Robert Lee Taylor/ Director of DSI/N Operations – Pacific Rim
2625 Colby Complex, Building/Suite 3-158
Everett, Washington 98201-2971

■ Super Formula/ Data Arrangement =

UNION ALLIANCE/ COLLECTIVE SECURITY 2002/ 3 A.D.
EPIC REPUBLIC
EPIC NATIONS
Multilateral DSI
Manifested as Never Before
Re-Declaration of Independence 2002
at Harvard University's John F. Kennedy School of Government

Total Fulfillment of Congressional Requirements

Amazingly, the DSIN formula totally fulfills the Congressional requirement to design and procure appropriate capabilities for technical collection to replace aging systems, a substantial increase of funding for National Foreign Intelligence programs and the beginning of a substantial investment to institute intelligence capabilities required to protect national security and to provide the first line of defense against terrorism and other transnational issues.

New Multi-Agency Location Codes Shall Be Assigned to Represent Organizations for the Purpose of:

- (1) Streamlining
- (2) Fulfill Third Party Requirements and Accomplish Agency Assets/
Equity Management

Example – A1X0 (DSI/N Unique Federal Information Processing System Code Assignment)

DSIN Law Enforcement/ Joint Operations Doctrine

DSIN Leads a Multi-Agency Super Task Force in the areas of:

Counterespionage, Counterterrorism, Counter Narcotics and Counterintelligence

DSIN provides imagery, human, signals, measurement and signature, open source, technical, and counterintelligence information as well as leadership, force protection support and other advanced sources and methods. DSIN receives many applications from active military personnel. And for the record, one might find it interesting to know that DSIN is actually comprised of select active duty personnel from every armed U.S. military service—and some foreign.

(Note: This text also appears later in budget call)

Qualifying individuals from eligible organizations / components are invited to collaborate with us at our new cyber security and information electronic warfighting base, centers, facilities and annexed complexes. For invitees, we have listed:

This list is in no way exhaustive. If you do not see your entity, please be advised all eligible state, federal, military and cleared academic / civilian specialists are invited. Contact DSI/N Operations if you wish to cooperate.

Congress – All U.S. Government executive branch departments and agencies – CIA/DIA/DEA/DSS/FBI/NSA – Office of the National Counterterrorism Executive – NIPC (National Infrastructure Protection Center – Bureau of Justice Assistance / RISS Center Services – The National Cybercrime Training Partnership (NCTP) – Homeland Security – NASA – Institute for Intergovernmental Research (IIR) / State and Local Anti-Terrorism Training (SLATT) Program – Interpol and More

If you wish for DSIN to represent your organization, contact DSIN Headquarters to request that your cyber defense security intelligence requirements be added to our inserted multi-agency budget call.

Geopolitical Thesis of Societies on the Brink of Total Destruction

“All those who have sought throughout time and long before it was conceived to destroy the United States of America, the highest Western Christian ideal, and the Church as a whole”

The above hyper-theses, which are located throughout the DSIN Legislative & Budget Request for FY 2003, are dedicated to the men and women of the craft...masters, apprentices, secret watchers, holders of special knowledge, info-runners and info-soldiers

...who have lived double, triple, quadruple, and more lives...who have overcome socioeconomic and geopolitical barriers...and who as a result, spiritually experience what less than one percent of the worlds knows...

...we fight with all our being so that others shall know and so that we shall all be set free...

In the universal battle of good versus evil, despite the eon or day throughout the multiverse and regardless of good or evil or how modern or ancient...energy...soul spirit entities, however transformed...remain among us at and war...even those who appear dead and lost

Nay...

The book has been written...they are not really dead, nor are they forever lost

Unclassified List of DSIN FY03 Budgetary Items

- Interagency Transfer of DOD Personnel
- Secure Upgraded NSA Computer Information Security Equipment
- Publishing House Additions
- Enhanced Cyber Security and Information Electronic Warfighting Infrastructures
- Lawrence Livermore National Laboratory Project (Bio-Weapons Scanner)
- University of Washington Cyber Defense Security Endowment

Proponents:

- FY 2003 Defense Dept. Programs (U.S. Senate)
- Subcommittee on Defense of House Appropriations Committee
- Official AT&T Partnership
- Defense Authorization Legislature
- Joint Intelligence Committee

Special Projects Potential Sources of Funding:

- Intelligence Appropriations Act
- DoD Appropriations Act – Counter-Terrorism and Operational Response Transfer Fund (Director of Central Intelligence)
- Department of State “Office of Policy Planning and Budget”
- Commerce, State and Justice Appropriations Act
- Defense Emergency Response Fund
- U.S. Patriot Act
- Defense Intelligence Agency and All Other Military Intelligence Components

TIARA – Tactical Intelligence and Related Activities
DARPA – Defense Advanced Research Projects Agency
Department of State
Homeland Defense Legislation (Approved 6 July 2002) -- \$31.5 billion focused
on anti-terror operations
State Military Departments (State of Washington – Timothy J. Lowenberg/
Assistant Joe Huden)

Estimated Proposed Spending as of February 2002

Homeland Security Request Approximately \$37.7 billion
Total Presidential Request \$396 billion

The #1 Bi-Partisan Campaign, #1 Priority Focused and Direction Finding Concept Team

AONN/ Access One Network Northwest U.S. Defense Security Intelligence/
Network national level, special federal independent, multi-agency service, and
intelligence community, is comprised of both current and former intelligence officers
from various government agencies, armed forces and the academic/ private sector.

The primary ongoing mission the service encompasses the entire gamut of the
super strategically combined fields of defense, security and intelligence. AONN DSI has
ingeniously combined in a multilateral sense, areas such as advanced HUMINT (Human
Intelligence) collection, processing, and dissemination with law enforcement, counter
narcotics, weapons of mass destruction non-proliferation, counterespionage and other
such intelligence, defense and security fields in ways that have never previously been
achieved. AONN DSI champions legitimate government and non-government causes in
correlation with U.S. foreign and domestic interests.

Defense Department/ Pentagon Charter

AONN DSI is a 24-hour data exchange system of which the scope of the information is as William Webster indicated. His words were: “...The scope of this information includes virtually every kind of information-information from all parts of the world-economic, political, military, scientific, information about people, places, and events; events that have happened and might happen-wars, coups, terrorist acts, crop failures, elections, famine, drug trafficking, and natural disasters...”

Charter Continued:

Defense Security Intelligence Network Mission – Protect America At All Costs

Even Years Preceding 9/11

This Has Been Our Aim:

Our core mission is to defend America's streets and communities in areas where there has been little or no oversight, isolate and defeat terrorists domestic and foreign who are operating both in and out of cyberspace, expose corruption and extremely difficult to identify threats to the national security while implementing countermeasures to such, create new laws through legislation to protect citizens, penetrate what have traditionally been nearly impenetrable networks, and reform by means of altering previously criminal and anti-American ideologies.

**“Vast and complex government systems (e.g., communication) are
streamlined...”**

Sample Intelligence Product

It's All Data ...Alphanumeric

Our Advanced Analytic Production and Service of Intelligence to government, the American people, and larger world community, accrues capital by increasing society's educated awareness of government programs and related resources.

DSI/N is computerized as well as fully-automated to meet the ever-growing 21st Century needs of our customers who are the policymakers and decision makers of the U.S. Government and friendly nations. DSIN disseminates accurate and timely intelligence reports in support of all levels of command. [DSI](#)

Archetype of Immeasurable Genius

“Designed By High-IQ (Over 190+) Kids Who Were Consulted and Trained By Star Military and Intelligence Veterans – One Thing That We Always Remember Is That Things Are Not Always What They Seem To Be...Misdirection...The Enemy Uses Denial and Deception and Deceit...Therefore We Must Be At Least Twice As Clever...Thrice As Crafty...”

Statecraft & Tradecraft...Mastery of Skills In a Dangerous and Volatile Environment...Stability Is Key

There are seven primary intelligence source types: imagery, human, signals, measurement and signature, open source, technical, and counterintelligence.

Taken from raw data and transformed into workable intelligence information, we derive original and advanced concepts, which are light years beyond state of the art.

Data Map It and Magnify Creativity

Select “Strategic Intelligence” from among the following three options:

Strategic, Operational, or Tactical Intelligence

Data Sketch:

Actionable Analysis – Legislation – Publicly Motivational American Political Ideology
(PMAPI)

Maintaining International Peace Dialogue – New Ideas Insight – Agency Identifies and
Eliminates Unnecessary Data Thereby Creating Multimillion Dollar/ Multibillion Dollar
Budgetary Offsets – Reduction of Expenses – Maximum Interagency Cost Effectiveness

Redefining America and Redesigning Defense, Security, and Intelligence
Infrastructure/Architecture – Balancing Methods and Viable Source Integration

Breakthrough Sciences and Discovery Navigation – Utilizing Non-Traditional and Anti-
Bureaucratic Systems In Concert with Tradition and Absolute Diplomacy – Reliability,
Practicability, Predictability and Fusion

*New and advanced national security protocol, codebreaking, encryption,
and geopolitical analysis*

AONN develops highly complex cryptographic code for use in U.S. national security systems. Chief AONN DSI products are advanced counterintelligence systems and methods, military-class computer hardware and software, “new math” science and technologies, and foreign intelligence analysis.

"Imagine a uniquely designed information security agency operating in the Pacific Northwest while providing D.C. policymakers on the opposite coast with timely and accurate geopolitical analyses, projections and intelligence reports. The agency's perfect media track record in the proprietary sector, clandestine nature, practice of hiring computer security experts and ingenious posture, make it the ideal player in this particular line of 21st Century global business."

-Jessica Daniels/AONN Public Affairs 1st Quarter 2002

The 7 Primary AONN Functions are:

- 1.) U.S. National Security, Risk and Threat Assessment i.e., Information Security (InfoSec);
- 2.) New Math Science and Technology/ Research, Analysis & Deployment (RAD);
- 3.) Intelligence Studies i.e., Counterterrorism and Cryptologic Systems;
- 4.) Geopolitical and Foreign Intelligence Analysis;
- 5.) Criminal Investigative Services: Data Forensics (Recovery), Background Checks, Skip Tracing and Non-Partisan Political Committee Liaison (All Branches of Government e.g. City, State, and Federal);
- 6.) Special Projects and Reports: Domestic and Proprietary Multimedia Audio/Video Design, Engineering, Production, Publishing and Distribution; and
- 7.) 24-hour Computer Technical Support Assistance, Consulting, Repair and Emergency Response

In addition to the 7 Primary Functions as indicated, AONN is tasked with the following:

- A) Publications to the extent of Declassified reports and analyses
- B) Highly Advanced Satellite Telecommunications Technologies

- C) Computer Information Security Software; Next Level Information Assurance Architecture
- D) Broad-Range Security Systems
- D) Advanced Defense Weapon Systems (i.e. Kinetic Weapons, both lethal and non-lethal,
- E) Special Operations [PsyOps], Threat Reduction Methodologies, etc.)
- F) Artificial Intelligence (AI)
- G) Nano-Technologies
- H) Bio-Medical Technologies
- I) Data Systems Streamlining/ Project: “Epic Republic”

History

Conceived in 1986 and created in 1995, AONN began as a military families association of IT/Information Technology, Electronics, Mathematics and Science students at the college and university levels. For the next seven years, AONN conducted a global intensive research and development effort and accelerated in the fields of Defense Analysis, Non-Proliferation and Threat Reduction, before ultimately becoming the **foremost new theory authority** in the highly specialized area of Counterterrorism. Now, an independent Defense Security Intelligence (DSI) Network tasked with Northwest Pacific Rim Theater Operations and global response, AONN reports timely analyses to top Washington policymakers as authorized by Congress and United States Code (U.S.C.).

May 2002 Public Address from AONN DSI Director of Operations

For Immediate Release:

Our agency is proud to support, unlike any other entity in world history, the various defense, security, and Intelligence Community member organizations of the United States and Allied Nations and would like to take this time to thank the many of you working in academia, policy and private sectors who have helped to assist in the transition from Research & Analysis to public domain. Thank you.

Respectfully Yours,

Robert L. Taylor III / Director of Operations

U.S. Policy Support

Information Directorate/AONN Defense Security Intelligence (DSI)

AONN Human Resources/Defense Programs Finance & Staffing Division

Intelligence Sharing/ Customer Service

National to International Assessment, Estimates/Requirements and Logistics

Preparation of Collection Plan, World Targets and Tactical Posture

Enemy/Threat Identification/Location, Capability, Intention and Overall Power

DSIN collects, processes, warehouses, permanently archives, and disseminates information, which affects society as a whole, but that ninety-nine point nine percent of the world won't hear about in the news or find on the World Wide Web.

Being that the Network is a multi-agency, joint-counterstrike force and possesses

such a culmination of some of the world's brightest and most brilliant intellect, intelligentsia, academicians and minds, it can quite easily be said that the AONN DSI concept by itself is worth multibillions. AONN DSI is incredibly charismatic. Our intelligence experts are powerbrokers capable of almost unimaginable negotiation skills. One scenario is that in a friendly foreign sector in need of highly advanced anti-satellite defense systems and related satellite communications hardware and software, DSIN has the inside track, top analytical support and means with which to obtain and secure said equipment for our customers for the lowest possible price on the planet. DSIN has access and the powerful capability to seamlessly mitigate millions of dollars worth of sensitive data at a lower than wholesale cost in exchange for twice that which our agency spent. As one can simply deduce, millions of dollars can be accumulated in a brief matter of minutes.

Our officers are specially trained to get information from point A to point B and do so in the midst of chaos. We make perfect sense in a world fraught with disinformation. We are tasked to find and annihilate denial and deception operations. Conversely, we help to get our customers ideas across ...and that often means across borders.

AONN DSI also extends to share in, on the average, \$250,000 worth of government contracts with our financiers. Typically, DSI will agree to terms of split payment on contract disbursements. Allotment can be considerably larger ranging from \$250,000 to several millions or even several billions for that matter. Much of this is obviously confidential, however, it can be stated that AONN has created a robust system of defense monetary fundraising via a mechanism of discreet apportionment. More simply put, our formula is coded – multidimensionally encrypted.

**Issuance of Advisories and Notification of Ready (i.e., Open, Go, Standby)
Status to All Agencies of a Common Concern**

DSIN is paid to campaign for and promote just causes determined by means of deep analysis to be for the greater good. Our agency makes professional judgments. We adhere to a philosophy of minimizing redundancy, and keeping information clear, concise and to the point. DSIN directly deals with crucial issues affecting international security and both U.S. domestic and foreign policy. We help those who desire to see the bigger picture. DSIN advocates on behalf of strong leaders.

Around the clock in multiple time zones

AONN DSI maintains an ultra-sophisticated 50-state and foreign database of government, military, political and commercial/ private-sector assets. Our intelligence data come from both open and closed-sources as we are naturally aware in our dynamic Earth system. We provide liaison, world-class consulting and accomplish what others cannot. Our task is astronomically difficult and it is for the security of the People and the future continuity of U.S. Government foundation, that we hold to the highest American ideal. The craft of espionage predates modern times and is found in case history throughout the Bible and in the formation of the United States itself. Secrecy is golden, an art, science,

catalyst for positive change and central to our collective civilization, history and evolution as an industrialized nation.

Spies Like Us

*Cloak and Dagger to Computers...
Modern Civil War and Urban Geopolitical Warfare
... To Operation: Enduring Freedom*

From Spy to Spymaster...

It has been said that the CIA is in fact, not a product of the Cold War, but rather it is more than anything, a bi-product of World War II. AONN DSI clandestine lineage to and division of the Intelligence Community, on the other hand, is very much a product of the '70s, '80s and '90s and what our analysts consider to clearly be an extended and ongoing Cold War. The truth is, we have always been at war even at home within our own cities and communities in the United States. Furthermore, our agency understands that there has always been a state of constant war of good vs. evil and that nearly every city, township, state, province and nation during every era throughout time, has experienced some kind of civil/political war in spite of history books not particularly having reflected or documented such.

Becoming an AONN Defense Security Intelligence Counterintelligence Officer

As a 24-hour global defense, security, intelligence network, AONN DSI is tasked with and responsible for a myriad of community policing duties, anti-crime, reform and national security initiatives, as well as protecting America's cyberspace and various critical infrastructures. DSI Service is akin to living what has been referred to as a "monastic" life and clearly is not for everyone. DSI training is rigorous, and excruciatingly sacrificial, to say the least. On the other side of the coin, the highest achievers will experience what relatively few people in the world ever have and what few people ever will. Only serious candidates should apply. AONN DSI is an absolutely drug-free workplace and an Equal Opportunity Employer (EOE). Applicants for employment must be U.S. citizens. All that it takes to succeed in any field is positive initiative. Do your part to help save the world.

Partnerships, endowments, corporate, commercial, institutional and private sponsorships are managed through AONN DSI Public Affairs Office.

Components and eligible individuals seeking information regarding procurement, contracts, vacancies, and employment, please contact administration through our public affairs U.S. West Coast hotline at (206) 666-8078 (extension provides **24-hour messaging assistance**) and/or by the following link [public affairs](#).

SUMMARY:

Qualifying individuals from eligible organizations / components are invited to collaborate with us at our new cyber security and information electronic warfighting base, centers, facilities and annexed complexes. For invitees, we have listed:

This list is in no way exhaustive. If you do not see your entity, please be advised all eligible state, federal, military and cleared academic / civilian specialists are invited.

Congress – All U.S. Government executive branch departments and agencies – CIA/DIA/DEA/DSS/FBI/NSA – Office of the National Counterterrorism Executive – NIPC (National Infrastructure Protection Center – Bureau of Justice Assistance / RISS Center Services – The National Cybercrime Training Partnership (NCTP) – Homeland Security – NASA – Institute for Intergovernmental Research (IIR) / State and Local Anti-Terrorism Training (SLATT) Program – Interpol and More

ADVANCED LEXICON – GREATER SYNTAX – MORE BALANCED

– MASTERS OF LEXICOGRAPHY

For the purpose of clarity we have disregarded certain outdated rules with regard to punctuation in some areas such as capitalization, line spacing, compounding, and other style matters. The science of writing composition is constantly evolving and various English grammar rules don't always make sense in every case. Contemporary syntax is often ambiguous therefore we have created some new rules using our own trademark style. For example, some authors when composing titles and headings, do not capitalize 'a' in "an", 'i' in "is", or 'o' in "on." We on the other hand, for the sake of uniformity and aesthetics, do. To us, it looks much better the way we do it and the text is considerably more balanced. The other way makes no sense and is traditionally executed in such a manner for obsolete reasons. We do not follow patterns that make no sense. Please observe the following and determine which of the two looks better in your opinion:

Protect America At All Costs
Protect America at All Costs

We prefer number one based on the fact that both one and two are correct and when we researched various book titles found in databases around the world, some world-class authors follow the second convention, while other authors follow the first. Again, to us, the first looks better and is clearly more balanced. And for the official record we did ensure that all text was uniformly 12-point or less (possibly less in some places) and Times New Roman font. Another change we made was that we did not double space our entire document, but in many cases we intentionally used three, four, or more spaces between headings, paragraphs, text, and titles. One will find that we did in fact follow conventional architecture by approximately ninety-eight percent, but that we also deviated for both good and logical reasons. If there is any element of our initial draft that is ultimately deemed insufficient and therefore unacceptable by the majority, our attorneys will make any and all necessary changes. But nevertheless, we are masters and leaders of information, thus masters of information management and our document is a masterpiece work of art. If someone or a small handful of people disagrees, he or she or the small group will come to realize that this document has been created so that it can easily and most seamlessly be codified. This powerful manuscript can be modified to

code within hours to any degree indicated versus any would-be critic who really has nothing remotely close to a visible and quite tangible solution to geopolitics and many of society's previously unsolved problems dating back to ancient times, as we have clearly produced. Our creation is nearly twenty years in the making and we have done our homework more so than most humans as anyone can see. In some instances, our officers have individually had to perform the work of more than a thousand men and women because no one else would do it. We have no problems in nominating ourselves for any awards of which we deserve. The DSI/N Public Affairs staff is willing to discuss matters in respect to press conferences. Our agency is more than worthy of a multibillion-dollar merger from the outset. So please by all means contact us if you think you have what it takes to be on the team.

Presently, we are a special federal independent service based on, inspired by and created after the Amtrak government corporation model. Please see public disclosure. By many within government and the public and private sectors, DSIN is honored and recognized for its monumental achievements above and beyond the call of duty. Our legacy is epic.

The calculated net effect of the AONN Information Security Infrastructure (AISI), reformation, and anti-crime measures in concert with said national security initiative, will be a shocking, never before seen, and absolutely drastic reduction in overall crime in the U.S.

DATES: The Management & Governance - Intergovernmental relations & collaboration program "AONN U.S. Defense Security Intelligence Service" was officially made public domain at approximately 8:00 PM (EST)/ 5:00 PM (PST) on Friday, May 17, through the Institute for Government Innovations 2002/ John F. Kennedy School of Government at Harvard University

Public Affairs Officers / Point(s) of Contact **(p37)**

There are seven primary intelligence source types: imagery, human, signals, measurement and signature, open source, technical, and counterintelligence. AONN develops highly complex cryptographic code for use in U.S. national security systems. Chief AONN DSI products are advanced counterintelligence systems and methods, military-class computer hardware and software, “new math” science and technologies and foreign intelligence analysis. One chief difference between AONN DSI and other agencies of a somewhat similar nature is that AONN DSI is headquartered on the West Coast versus the East Coast. On the West Coast there is an absolute need, thus an imperative for U.S. Eastern type agencies. The AONN DSI primary focus is more on that of in-the-field actionable counterintelligence and counterterrorism, than codemaking and codebreaking (cryptology). AONN has the utmost respect for its many predecessors such as the Central Intelligence Agency, Defense Intelligence Agency, Federal Bureau of Investigation and National Security Agency and would never make any attempt to duplicate effort and reputable systems already in use. Rather than condemn these agencies as many do, we on the other hand, commend these agencies and always have. What armchair critics and cynics don’t understand is that if it weren’t for the CIA, DIA, FBI and NSA, the United States wouldn’t exist and if it did exist without these very mechanisms of governance, the country would be in a state of total anarchy. We admire, look up to and are inspired by the courage, successes, sacrifice, dedication and qualities of the men and women who work for our nation’s national security interests.

Exactly What We Do

AONN DSI is the highly trained, ultra sophisticated, hands-on, hand-to-hand combat, cloak and dagger, spy hunter component of our nation’s new logical defense system. The Pacific Northwest is full of intrigue and without an agency of this magnitude in our part of the world to coordinate with preexisting agencies in other parts of the country (e.g., D.C., Maryland, Virginia) our national-international system of living and way of life would unquestionably shutdown. AONN DSI has taken the lead. This is what America always wanted and needed.

We Work for the American People

“Designed By High-IQ (Over 190+) Kids Who Were Consulted and Trained By Star Military and Intelligence Veterans –

One Thing That We Always Remember Is That Things Are Not Always What They Seem To Be...Misdirection...The Enemy Uses Denial and Deception Therefore We Must Be At Least Twice As Clever...Thrice As Crafty..."

AONN DSI is a 24-hour data exchange system of which the scope of the information is as William Webster indicated. His words were: "...The scope of this information includes virtually every kind of information-information from all parts of the world-economic, political, military, scientific, information about people, places, and events; events that have happened and might happen-wars, coups, terrorist acts, crop failures, elections, famine, drug trafficking, and natural disasters..."

Mission Possible:

Looking back at the initial stages of development of every already known agency in addition to each one of those agency's pros and cons, our scientists have created a fully automated and streamlined working model of each agency's good points and combined all of them. We have notified every conceivable executive department of our intent to work for the American people and do so officially as the AONN U.S. Defense Security Intelligence Service. Our core mission is to defend America's streets and communities in areas where there has been little or no oversight, isolate and defeat terrorists domestic and foreign who are operating both in and out of cyberspace, expose corruption and extremely difficult to identify threats to the national security while implementing countermeasures to such, create new laws through legislation to protect citizens, penetrate what have traditionally been nearly impenetrable networks and reform by means of altering previously criminal and anti-American ideologies.

AONN DSI strictly adheres to **covert action policy** and will only engage in such activity at the direction of the President of the United States and Congress.

Our portfolio of accomplishments has been disseminated as an official briefing to the President and Vice President of the United States, Congress, and every major department in the national hierarchy. To this end, we have notified the White House, the State Department, FBI, FBI Counterintelligence, the Justice Department, Department of Defense, CIA, NSA, the entire Intelligence Community and the Office of Inspectors General. The AONN DSI new national security program was created for the People and government and is being exhibited at Harvard University John F. Kennedy School of Government/Institute for Government Innovation 2002. The same information has been

provided to National Archives and Records Administration as well as the Federal Register.

Operatives Among Us –

Defenders and Guardians of the Constitution, Democracy and the American Republic

The United States has never witnessed such patriotism. Example: Students from among various economically deprived population segments have coordinated an incredibly advanced, large and sophisticated, high-tech work force for government. These young thinkers have pledged to turn over their businesses to the federal government system so that monies and information portals created in from such program and effort can be used for counterintelligence purposes. This is a back door for warfighters in the already spread out multinational AONN DSI network. AONN has created a multimedia affair, which provides for necessary worldwide surveillance. The media reports and gets as close as it can to information that is often purposely hidden from the media. **AONN also is the media** and therefore a reporting agency and so naturally does the same. AONN's media apparatus makes for **a perfect data trap** and terrorist snare. Imagine all peoples speaking a global message of anti-terrorism. As Agents of Influence (AOI), AONN is the ideal vehicle for this – the best anti-terrorism vehicle in the U.S. and perhaps the world – we speak the truth. **AONN appeals to the youth generations** and has helped in a quantum way to rekindle what was thought to be a **long lost spirit of patriotism**. AONN Gen X officials have said no to and put behind them, the typical, adolescent, rebellion so common still even in an overwhelming number of young adults. This has been done so that we may all come together for all communities. Furthermore, imagine a program so uniquely designed that its purpose is to **transform so-called “gangsters”** who are really would-be offenders and at-risk youth and young adults, **into counterterrorist operatives**. We have created such an outstanding program that yields a one hundred percent success rate. Never before in history has this been achieved. Young scientists in a less than one percentile group created this remarkable entity so ingeniously that it will function and help unlike ever before to give the streets back to law-abiding citizens—the People of the United States. Through the sharing of never before obtained urban intelligence and the transfer of special beyond state of the art technologies and **systems of impressive psychological operations** designed by this astonishing outfit, **would-be offenders, at-risk youth and young adults are redirected to the military, military recruiters and other such federal programs** and administrators.

Can You Work 24+ Hour Days When Required and Still Maintain Your Posture?

Try It Five Years In a Row – Sacrifice Made for Country

AONN DSI is an elite counterterrorism organization, which provides highly logical and crucial strategic, tactical and operational intelligence to policymakers and decision-makers. This is done even without security clearances as High-IQ analyses are cooperatively provided to government and civilian specialists authorities. We are the “geeks” (as colloquial as it is, there is no way around this term, for in truth it expresses a purely positive meaning) who know what no one else does despite problems and issues some of our officers had encountered with local police as youth. This is precisely what America wanted and needed. We do not represent the criminal element, nor have we ever. Adolescent misunderstandings among parties nevertheless produced a generation, which in turn created an institution of citizens dedicated to the fight against evil. There is no turning back. **Once you have taken an oath and made a vow, there is no way “out.”** You are dedicated indefinitely to the fight against crime and global corruption. If one ever recants, one is forever cut off from the tribe of the civilized world and exiled to “outer darkness.” It is either that or the United States be destroyed. There is no margin for catastrophic error. **As a 24-hour global defense, security, intelligence network, AONN DSI** is tasked with and responsible for a myriad of community policing duties, anti-crime, reform and national security initiatives, as well as protecting America’s cyberspace and various critical infrastructures. DSI Service is akin to living what has been referred to as a “monastic” life and clearly is not for everyone. Translated: Our regiment is such that we live as monks. **DSI training is rigorous**, and excruciatingly sacrificial, to say the least. On the other side of the coin, the highest of achievers will experience what relatively few people in the world ever have and what few people ever will. **Only the most serious candidates should apply.** AONN DSI is an absolutely drug-free workplace and Equal Opportunity Employer (EOE).

CounterSpies

Our officers have shared critical national security intelligence and cooperated with the FBI, among many other agencies and organizations, and tracked cyber-terrorists both foreign and domestic, penetrated networks, isolated hackers and both extrapolated and deciphered complex intelligence data. Composite to foreign operatives in the Washington D.C. metropolitan area, who become walk-ins, we too have come to U.S. agencies of a common concern with what we know.

>>>Foreign agents who initially set out to commit espionage and thus irreparable and exceptionally grave damage to the United States are given jobs.<<<

Therefore, our organization has the job of and is tasked with being responsible for counterintelligence because it must be done and no one else is looking out for the holistic safety of our freedoms and infrastructures on this level in our part of the world. Former U.S. President Bill Clinton spoke in regard to such sectors where there is extreme government corruption, little or no oversight and legitimate complaints by citizens about such conditions. Based on our Urban Geopolitical Intelligence repertoire as well as new counterintelligence math and science created by us to hunt deadly terrorists, no one else on the planet is more qualified to penetrate our own dangerous sectors – no one else speaks the language.

Derived from mathematics and world-class research, our award winning solutions are equally the results of our specialists. Our experts scourer the planet seeking only the best and brightest candidates from every specialty field. We hire and recruit from among top students, graduates and even independents, in the areas of computer science, electronics, video production, journalism and political science, etc. Being that AONN is both a commercial and government entity registered with the United States Department of Defense (DOD), the agency provides logistics, creativity and support to military as well others throughout the vast sea of strategic alliances, affiliations, partnerships and so forth. **Many of our intelligence analysts are asked to participate in think tanks** and unclassified to sensitive discussion forums. We are the government as well as the media, so AONN provides everything from news and editorial assistance to the latest in leading edge Arts & Sciences. If a business is in need of one new or used computer, or five hundred computers for data collection and processing at a new Saturn moon base, we deliver. Moreover, our agency has been responsible to communicate our every move to the Intelligence Community as our intelligence activities are naturally highly monitored.

Example of An AONN IO's (Intelligence Officer's) Resume:

Employment History

INFORMATION SYSTEMS SECURITY TRAINING (Beginning 1999 to August 2000)

FY 2002/ 2003 (AONN DSI/N)

U.S. Defense Security Intelligence Network Congressional Budget Request

Ultra-Patriot Security (Anywhere, USA)

- Gained knowledge of advanced security systems theory under guidance of military contracting firm
- Experience included open source tasking, collection, processing, and dissemination
- Conducted vulnerabilities research, threat and risk assessment, competitive economic analysis, and contributed to the development of new systems theory
- Consulted buyers as well as distributors of information products and services and earned permanent member status as a result of commission made from client purchases
- Studied both political and investigative sciences and practiced information war simulation counter-offensive strategies; Federation of American Scientists supporter/advocate

Education & Experience

Attended school and lived on campus (student housing) at Anycollege in USA from 1998 to 1999

Enrolled in numerous pre-college/college programs: High School Advanced Placement (Advanced Studies) – College: Computer Fundamentals, Communications, Office Technologies & Administration, Electronics Engineering (EE), Business Law (Independent Study) and Business Management – Accepted to EWGOU (East West Grand Old University) – MIS/Management Information Systems Major

Capabilities/Attributes

File managing, multitasking, planning & developing, scheduling, telecommunications & networking skills, high pressure situational decision-making skills and a super work ethic

Thousands of Hours of Immersion

Professional Background: Exposure to and Intense Study of Defense Training, U.S. Security Policy Board “Mission: Adjudication,” Department of Defense (PKI) Public Key Infrastructure Training, Information Assurance Program Management

Executive Summary (Impeccable and Absolutely Impressive Portfolio): Co-authored analysis and geopolitical thesis in a book about mixed-race, high-achievers, published by famous author

who is recognized as having authored the biographies of many celebrities and dignitaries world renown.

As a Youth / Student Government Representative and Leader: Creator of new U.S. security program through Harvard University John F. Kennedy School of Government Innovations In American Government 2002; Creator of Project “Epic Republic”

Provider of Above-and-Beyond-the-Call-of-Duty Top Analytic Support and An Anomalous Work Ethic – Operations Research & Development

Independent Study Beyond Post-Doctoral Level – Areas of study: Calculus, Logic, Knowledge Management, beyond state-of-the-art super computing, complex highly advanced mathematics, Artificial Intelligence (AI), next level broad-range security systems, cyber warfighting, highly advanced satellite technologies and Nano-Technologies.

Personal statement: Loss of friend... dedicated my life to the fight against global terrorism years prior to 9/11/2001. Working 20-hour days, this is all that I do; highly disciplined statesman; mentored by a childhood genius friend who recently received his Fellowship to Ph.D. in mathematics at the University of USA. I have over ten years of experience in data collection and processing with connections to the affluent international student and international business communities. I have rapport with friendly foreign services and top liaison to Japan, China, Korea, Bulgaria, Serbia/Croatia, India, Canada and the former Soviet Union. My urban and thirteen years of information gathering experience, coupled with a perfect media track record, clandestine nature and practice of hiring computer scientists, foreign language specialists, computer security experts as well as professionals and analysts in other fields, make me both an ideal and key team player in this particular line of 21st Century global business.

I have successfully completed and passed every conceivable psychological and medical evaluation on the planet as I have been involved in a considerable amount of academic, state and federally funded programs and politics.

As a young scientist I exchange data with military and intelligence personnel whom hold SCI, Cosmic and other such clearances.

I assisted the FBI in identifying and bringing to justice a cyber-terrorist whom operated from an illegal business front that impersonated and replicated FBI intellectual properties. I also assisted the FBI in identifying foreign nationals engaged in espionage, attempting to obtain sophisticated weaponry and critical U.S. intelligence data. End.

The Best Oversight Ever and a Perfect System of Accountability

How the Adjudicating Community Retains Controls – Congressional/ Government Oversight At Its Best

Prime Example of a DSI Analyst’s Accountability:

“On a daily basis, I routinely communicate and network with officials from all branches of the U.S. Armed Forces, Defense Department, Intelligence Community and all other departments of city, state and local government, academia, major U.S. and international businesses, corporations, political parties, societies, associations, organizations, special interest groups and so on. At the behest of encouragement from government planners, I have turned over my findings to be used for the purpose of counterintelligence and other operations ideally conducted through our intricately designed multi-modal infrastructure. Thus my high profile and close daily work with intelligentsia provide for a perfect system of accountability. **There is no reason to flee from civic duty** and nowhere to run to anyway. Once under the microscope of international surveillance, it is only a matter of time before one is apprehended and/or can never legally return to one’s homeland. I, on the other hand, am highly visible. Faced with armed personnel and via a series of checks, balances, routine auditing and oversight, I am tremendously responsible. And going above and beyond the call of duty, I, along with my colleagues i.e., some of the most brilliant independents and university and college students, created **a widespread network capable of penetrating historically difficult-to-penetrate information target zones**. We are able to reach people, data, information and locations of which to reach, obtain and extract crucial elements of such, has traditionally been nearly impossible. Our system of operations is unique in that our working model functions on the principle of utilizing non-traditional methods and sources. Simply put, we were able to figure out what others previously could not accomplish, and did just that. It took over a decade of being a “geek.” **We are America’s Shadow Warriors** in spite of some of our officers’ not so perfect offender scores. In many cases an individual will have been persecuted because of his/her intelligence and have been altogether innocent of all charges brought against him/her. This is what our agency knows to be true. **AONN DSI Service has a “do or die” directive to conduct security intelligence investigations** and operations using the latest technologies and sources and methods to figure out exactly what happened. The following is an example:

**A True Story – Testimony of a U.S. Information Warrior Caught In the Net
Delivered to the White House and Congress – Statements to the Press**

Note: This information has been salvaged so the text appears staggered in parts

**From Published Events – Report from a Warfighter Tangled in the Web – Written
as a Thesis to the World of Academia – An Intelligence Report from America’s
Frontlines:**

**“All those who have sought throughout time and long before it was conceived to
destroy the United States of America, the highest Western Christian ideal, and the
Church as a whole”**

Innovations In American Government 2002

Geopolitical Thesis of Societies on the Brink of Total Destruction

How Rogue U.S. Police, Cults, Global Supremacist Networks, and Ancient

Secret Societies Have Played An Absolutely Central and Meticulous Role in Working to Destroy the United States and Other Countries By Denial and Deception – Washington State Identified as a Major Base of Operations on Coast Hidden Far from Nation’s Capitol

“My mission, I was told, was to buy, sell, and trade automatic weapons. The people who put me up to this play a deadly and super elaborate game. I was nineteen, merely a kid, and these operatives under the guise of law enforcement destroy my young life. They knew that I had charisma and a large assembly and that I could make major political changes, so they came after me...and they came after me to kill me.”

“I am encouraged to see the amount of research that you have done and that you have requested the media becomes involved in your case
-Washington State Senator Jeri Costa

“Irreversible Damage” to the United States is defined as:

Exceptionally grave damage includes war against the United States or its allies, the breaking down of foreign relations vitally affecting the national security, the compromise of vital national defense plans or complex cryptologic and communications intelligence systems, the revealing of sensitive intelligence operations, and the disclosure of scientific or technological developments vital to national security.

One must seek friendly forces from within one’s government:

Look at the sinister creation of the criminal record referred to in this individual’s case. Think about it. Rogue police lied to jurors during trial and provided false data while the defense was suppressed. You will clearly see ridiculous charges, then the charges dropped, and equally absurd charges that remained. Observe how dangerous “small town” politics can be:

Interference With Property (Dismissed)

Offensive Littering (Dismissed)

Possession/Consumption of Liquor By a Minor

Obstruction of a Law Enforcement Officer (Dismissed)

Disorderly Conduct (Dismissed)

2 Fireworks Violations

Obstructing a Peace Officer (Dismissed)

Reckless Endangerment

D.U.I./Residential Burglary

Please people! Think about what you have just read. This is right out of the movies. This list reads like a common drama in which a youth is continuously being harassed by local so-called peace officers that have for whatever reason locked on to this kid and they have nothing better to do. But, then the FBI hires the kid because he's a top hacker and the FBI understands that the local police can be renegade cowboys who abuse power. #1, none of the list is real. It was created. #2, look at how many of the bogus charges have so far been dismissed, and doesn't it seem outrageous that this bumbling group of bad cops kept trying to charge this person with silly (there is no other word to describe this), crimes? #3, the Sheriff's Department which is typically responsible for extensive background checks, doesn't even have a single criminal record for this person. This person had a flawless record, and then suddenly between his or her teenage years, these ridiculous kinds of charges appear strangely. It doesn't add up. The fact is the kid was set up.

Now, look at a different example. The following is an actual front page report written for a USA TODAY Wednesday December 29, 1999 national newspaper article:

"By Edward T. Pound...Washington—As a teenager he was in trouble many times and built an imposing rap sheet: delinquency, disorderly conduct, resisting arrest, attempted theft, possession of a deadly weapon, possession of marijuana, five counts of burglary, and three of theft...In 1978, at age 21 and a heavy drug user, he and two accomplices kidnapped, robbed and murdered a fellow drug user. He was charged in the murder, convicted and sentenced to 30 years in prison.

Today at 42, he is out of prison and working in a white-collar job in the defense industry. **He remains on parole until 2006.**"

This means he still has thousands upon thousands of dollars in monetary obligations, fines and restitution still owed to the court system. "As a convicted felon, he can't vote in many states. But under federal law, **he can and does hold a government issued clearance, a privilege that allows access to sensitive classified information off-limits to most Americans. His case is not exceptional.** A USA TODAY review of more than 1,500 security clearance decisions at the Department of Defense..."

Think about that...as described, the abovementioned individual pled guilty to clearly heinous and utterly reprehensible capital crimes...

Now, look again at the fabricated: Interference With Property

FY 2002/ 2003 (AONN DSI/N)

U.S. Defense Security Intelligence Network Congressional Budget Request

(Dismissed), Offensive Littering (Dismissed), Possession/Consumption of Liquor By a Minor, Obstruction of a Law Enforcement Officer (Dismissed), Disorderly Conduct (Dismissed), 2 Fireworks Violations, Obstructing a Peace Officer (Dismissed), Reckless Endangerment, D.U.I./Residential Burglary...

In my case, I was set up. But, let's hypothetically suppose that this was someone else's rap sheet that had been forged. Does that person even sound dangerous? Look at these alleged crimes. This sounds like a little kid who kept getting clowned by the police. Matt Damon in Good Will Hunting even had a far worse rap sheet, and he was clearly admittedly guilty of violent felonious fighting and other such felony crimes as the NSA was to recruit him. Let's get real system.

Who would you rather have on your team protecting your nation's infrastructure: The mass criminally insane, violent drug dealer, kidnapper, murderer, sentenced to 30 years in prison,

Or...

...the kid who obviously was set up, has top skills, is highly disciplined, and unlike your typical young member of society, is to work and fully cooperate with your agency, be it the Justice Department, or any defense, security, intelligence agency? This young man is more than willing to serve his country in a counterterrorism/ legislative/ judiciary/ military capacity, and be a soldier that will fight side by side with you and get your back eternally...this kid is cream of the crop and deserves to be a U.S. soldier/ statesman on the winning team. This kid was never a criminal in the first place. This kid is not a criminal.

I have no real criminal history. Between 1986 and 1996, my friends and I were tortured by a group of police officers. The intellectual properties to this story are now owned by Hollywood to be published by an author whose name will be disclosed at a later time.

The most blatantly obvious characteristic of this particular scandal is the public fact that I had been a track star, award winning athlete, and advanced placement student, but then all of a sudden I received a series of preposterous and clearly falsified charges. Some of these charges I literally received through the mail. The County Sheriff's Office corroborates with me in that I have had no record in their system—ever. Yet, for some "strange" criminal reason certain police officers thought that it would be fun to play an elaborate game with my childhood friends and me. Nearly everyone on Earth that knows of my case knows that I am not guilty of these created crimes, and that includes the police officers behind this. Consequently, Navy officials offered me a full-civil waiver in 1999 after they had reviewed my case and knew within less than five minutes that the charges were trumped up. I had just begun a new semester in college and with all the extenuating circumstances I was forced to postpone an acceptance for military service. Unfortunately,

because of legal statutes and related clauses, I would have lost the only chance in the world to gather the information needed to exonerate me, even with a full-civil waiver having been offered.

I would have lost any chance at ever in my lifetime being vindicated, and if I would have entered the military in 1999, I would have been ten times worse off than I already had been being set up—this was all part of the elaborate set up. I needed to get out and investigate, put all the remaining pieces of the puzzle together, gather data, and connect with family that had been taken away from me and that I hadn't seen in years. I had lifelong, childhood, friends who were left helpless without any support losing faith and literally dying around me, and monies were owed on accounts because the opposition had arranged a situation in which, at age nineteen, I was falsely accused of nonsense crimes, which alone, the collective catastrophe put me at over negative one hundred thousand dollars. Navy officials were hands down apologetic that these things had occurred. I never pled guilty to any falsified charge and I was coerced into every one of the few guilty, however forced and fabricated findings. I was never guilty of any of the clearly made up charges from the corrupt network of city police. I had to prove this to the world. Family, friends, peers, and colleagues, etc., already knew this as many of them were attacked by the same regime and were caught in the wave of terror as part of the atrocities as well. I refer to the California, widely publicized, Rampart Scandal as my example. We are on the West Coast far from our nation's Capitol. There is often little oversight within our local police departments as is apparent in recent cases of corruption within cities and towns throughout our state and country as a whole.

Four officers were recently indicted on high charges of rape, tried, subsequently found guilty, arrested, and taken into custody.

I prayed to God Almighty that legal experts and analysts would discover the truth and that the officials who needed to know, would see that I was innocent of all fifteen charges between five courts all related to the scandal.

If you've ever seen the legendary movie "The Fugitive" starring Harrison Ford, then you will know that I have in real life experienced one hundred times the conspiracy than that of the Fugitive. Concurrently, I have been caught in a web one thousand times the movie "The Net." The evidence and proof that I have, officials find to be startling. I had been indoctrinated to work for government, was being groomed and mentored by true prodigies on their way to government posts and vacancies, but meanwhile, operating via elite and special university programs, and then I was set up. I had been a youth student government leader, but was suddenly cast into the depths of the underworld. Police officers gone awry and other criminals tried to kill my friends and me. I am an advanced placement student and a good kid, but was set up and subjected to the most hostile environment next

to actual all out war. I was forced into a ghetto light-years worse than low-income housing and ultimately into a cold “black” world.

Why are our prisons overpopulated and continuing to spiral out of control? Why must police continue to arrest innocent citizens to increase government spending and to stay in business? Why are bright children ridiculed for speaking out against corruption in a land where Freedom of Expression is supposed to be the foremost freedom?

The next time some little kid—some little boy—some little girl is kidnapped, tortured, raped, murdered... you sit back and ask yourself if this is not chaos and anarchy. Humans wake up and stop living the media induced brainwash... The Great Lie is the lie that many people tell themselves everyday when they wake up and look in the mirror. I refuse to believe it any longer, and everyday we move closer to total chaos.

This following information is to serve as a basis to enact legislation, whereby police misconduct cases will be treated as capital offenses. There should be no preposterous statute of limitation in any case in which poor people have been conspired against and who have no reasonable access to non-public legal counsel. Because someone didn't have the resources to properly and realistically be defended, does that mean that there should be a restriction related to how long that person has to file suit? No. This is absolutely contrary to America. If a person is not guilty of a crime, he or she is not guilty. Current limitations make no sense and are biased in favor of the wealthy. The attitude of some courts is that a case is a game and if someone who is poor can't come up with information to support their defense and/or resources to pay for a legitimate attorney in the defendant's favor within a specified amount of time, then the defendant has lost. The rule has been that the defendant cannot go back and correct the wrongful conviction. That is asinine and makes no sense. Many of the people who have been entrusted with the keys to our society and who have been deemed “peace officers” are those same people who have caused and who continue to cause, exceptionally grave damage to the United States. These so-called peace officers (SPOs we shall call them) are killing our children and any half-ass analyst will be able to tell you that this, if it continues, will in itself, be the death of the United States.

CIO Commercial and Government Credentials – Resume of Interest

Traitors to the United States – Answers from Near Prodigies, Hackers, and Top Geeks Regarding Massive U.S. Intelligence Failures and How Still No One Is Listening

This is a shocking story about a popular teenager who was robbed of his constitutional rights, harassed and beaten almost daily along with a group of childhood friends over a ten year period by corrupt police, and prosecuted for a series of falsified crimes that neither he nor his friends or anyone else in the world committed. This is a story about the most corrupt local governments without any real oversight within the larger United States. This is a true story about CAN (The Cult Awareness Network), ancient secret societies thriving in modern times, their worldwide battles for supremacy and geopolitical civil warfare in North America continued from the 1960’s on through to the year 2002 A.D. and beyond. This is a story about how almost no one listened to the truth and how those who did listen were left nearly helpless when they tried to bring the scandal to light; a story about a kid left for dead, but who eventually fought to make a comeback after having been set up and having lost everything. This was a young life that had been tortured and swept under the rug by a group of rogue and sophisticated criminals, but unlike the millions of other victims, this one refused to give up.

The main character is incredibly brilliant and was already an aspiring track star and computer genius by age four and a gifted student in advanced placement throughout his school career turned entrepreneur/scientist who at age twenty-six created a new U.S. national security system. When he was still a small boy, he had been left by his parents who were in the military at the time, to live with friends and relatives and was then persecuted by admittedly and openly racist police and crooked small town officials. This is a story in which things aren’t always what they appear to be and not everyone is who they say they are.

This is a story about war, a powerful nation teetering on the edge of complete chaos, and the wrongfully accused who have suffered with no resolve until now.

From the Forthcoming International Release – Conversations With Child Geniuses of Military Parents

“I am not a criminal. I am a United States citizen. The unalienable rights that every citizen of this country is supposed to have were stolen from me. Unconstitutionally taken from me has been that which in itself defines an American. Great wars have been fought as a result of much less. How can I possibly have returned to me the childhood, young adults years, experiences, opportunities and everything else that has been destroyed and forever lost because of this? I will be forever haunted by this great failure in the American Justice System. There is nothing material, nor any conceivable amount of wealth in space-time that could possibly compensate for my family members and friends who died and loved ones lost. This and other like scenarios cause exceptionally grave damage to the United States of America and form the basis for the anti-thesis of life itself.”

Nearly two hundred twenty-six years after our foremothers and forefathers, we too declare our independence.

Our Generation X was a scapegoat for citizens of the Old World. We were a product of the Cold War and blamed for the failures and abuses brought about by past generations.

Power. Greed. Jealousy. Hatred. Group conspiracy. What if a rogue group were to set up your relative who works for the city, state or federal government? What if someone planted cocaine or some other illicit narcotic or weapons in your relative's or a friend's possession? What if your loved one worked on an honest job related project that required a secret government security clearance and your loved one was later arrested for allegedly illegally disseminating classified information? What if someone or a group just hated you because and decided to make it a mission to destroy your life? Does this sound farfetched? It happens every day and it is destroying the United States. Please examine the following scenario:

...Your life is utterly destroyed. Your accounts have been drained as you had little in savings anyway, but nonetheless, your money has been depleted—it's gone. You have been back and forth between various court dates and have missed work. You have missed everything normal in life. You have missed school, your family, friends and everything else. The people who have done this to you have calculated your every move and

did so easily being that you are only nineteen years old. You have become a target and entered into a system in which for the sole purpose of evil, many elite powers play a deadly game. You have nowhere to run to, no one to help you, and who would believe your story—the year is 1994. Imagine being set up by the government, but it’s not really the government. Just like the movie, you are caught in the Net. But remember, this is no movie. It might as well be 2003 and your age and background are of no relevance...

“They jumped out of vans and threw us inside, then put security socks over our heads and covered our eyes so that we couldn’t see where we were going. They told us that they wanted to take out the “generals,” “captains,” “others” (subordinates) and “everyone else” they could net from the major “street armies.” I asked them what was so difficult since it was the apathetic and subversive culture that had helped to create and finance the “gangs” and American “street armies” as they called them and so how difficult would it be to find the people responsible for such. The officer in charge told me to shut my “f__in’ ” mouth and socked me in my ribs while his partners manhandled me. Then, sickly, he tried to switch his composure to being “nice” to “befriend” me right there on spot, but it had all been well planned for some time. First they tried kill us off, but before they did so, they came up with an addition to plot. They told me that they could help make the war on the streets if I of all people helped them. These were the same people that had declared that their goal was to destroy our network, but here telling me (and a few others in our fraternity) that I was absolutely going to work for their faction—that I had no choice. I was captured and told that D.C. was where a lot of “our” team was, but that on the West Coast, I was to make contact with an operative within the F.B.I. and that if I didn’t, they (the rogue handler and his team) were going to see to it that the judge worked with them to send me to “rot” in prison for the sentence that they had concocted for me. I was told that my mission was to buy, sell, and trade, automatic weapons in exchange for my freedom and the freedom of others. I had been on the high school rifle team and they knew that I had both skills in weaponry as well as a penchant for scholastics. They knew that my mother was an active naval intelligence officer of twenty-something years and that my father was a sociologist who had retired from Army Investigations. They knew that my parents didn’t communicate with each other and that my parents were out of state, while I was home alone. They also knew that I was vocal in the community, a threat to their entire network, and they wanted me dead along with all my childhood friends.

the
to

they were

The city went so far as to attempt to instate a city wide youth curfew and it failed to some degree when the youth brought cans of gasoline to City Hall, doused the building and flags hanging from poles outside, and chained the doors of the front entrance while the city council discussed final proceedings just before the curfew was to be implemented.

You didn’t hear about that on the national or world news did you? Oh,

but it happened and of course made the front page of the regional newspaper. If it had happened in 2002, it would be all over every newspaper.

I have reasonably concluded that I will not be complacent in what has transpired and that I would rather fight and take a great risk by letting the world know of the following accounts, than to accept an entirely falsified and created criminal record and to “just go about” my life as I have been coerced.

I was set up by an illegal fraternity of corrupt police officers and now have all the proof in the world. To: Governor Gary Locke...Mssg. Dear Governor Gary Locke, corrupt officials have tried to kill us...please assisttransmission ended...

Analysis

As one can clearly determine, the above scenario is very real and an absolutely terrifying account. An Army recruiter had told this person that even if the person's record were examined and ultimately vacated, without a pardon from the Governor or the President of the United States, this person's trumped up charges would still be considered and would likely disqualify the individual from active duty. That clearly makes no sense. This person committed no crime whatsoever and was the victim of an ongoing tyranny. Why would the military still consider the SPO's falsified data. That unto itself is a clear threat to national security and also a major turn off to a young and impressionable mind seeking to help what it believes to be a logical establishment. This is why agencies have major intelligence holes, and to clarify, it is because the system is ineffective as it is paradoxical. Our country's best talent is constantly being repressed. **Within the scope of this particular kind of situation, the subject could never win despite anything in space-time that he/she might do.** Unfortunately, and at the detriment of national security, the military really made no sense at all in that particular judgment. The military's statement was plainly arbitrary. This person is a genius, was tested, and placed in the less than 1% of the global population. **We need to let some people out of prison who should have never been there in the first place, train those people to be operatives, reeducate them using the latest technologies and modern methodologies, downsize our prison population drastically, separate remaining prisoners of various offense levels (e.g., separate violent from non-violent), close some prisons completely, encourage would-be criminals to work with the system and law enforcement, massively overhaul our country's judicial system, change old laws, oust overzealous and tyrannical officials, punish those officials who have committed war crimes against society and fortify our nation's defenses.** Meanwhile, we are shown that we are correct in our estimation that our best intelligence is being lost to ambiguity. Two weeks preceding September 11, 2001, the individual mentioned had also publicly stated his prediction that there was an imminent attack against the U.S. and that it would either be aimed at New York or Washington State's Microsoft Headquarters or both. The report went out to the Washington State media and White House. In 1998, this same individual also stated in a musical composition the possibility of an air raid: “In '99 to 2000 something watch for the air raid.” The song is believe it or not, made freely available on the Internet. Our service had for a long time, known that the two regions indicated are most sought after targets. Was anyone listening to our pleas before? The world simply did as it did while true fighters for freedom and security in the New World were holed up. Once again, we are reminded of

the truth: George Washington was inflicted by the tyranny. He was both our founding father and an American revolutionary leader. Did George Washington sit back and play by repressive rules? Of course he didn't. He created a counterintelligence institution to combat the oppressor. Had he not done this, it would have meant the utter destruction of his people—us. The British considered George Washington to be a criminal, a fugitive of justice, and a wanted dead man. George Washington was the number one enemy of the state. But, he knew that British legal rhetoric in all its "precedence" was the very tool by which his nation-state was being destroyed. He knew that the "laws" made no sense. Had he followed them...you would have never existed.

Union Alliance Collective Security – Redemption Agreement 2002/3 "Project: EPIC REPUBLIC/ EPIC NATIONS" (UACS RA 2002/3) – USNP2S (United States National Public Security System) – Project EPIC REPUBLIC is a nonpartisan project and does not imply any preferential relationship with the Republican Party, per se.

Institute for Government Innovations 2002

John F. Kennedy School of Government

Harvard University

I will personally ask my two favorite living legends, idols and heroes, Colin Powell and Condoleezza Rice, if I may so humbly serve under their wisdom and command under the Bush Administration. For, I have created the new United States national security system. This system can be called the Great Compromise of 2002. This system may be the greatest synergy and cooperative in U.S. history between the U.S. Government and the public.

1) Please provide a two sentence summary of the program.

This innovation, a campaign so revolutionary, is the 21st Century American Renaissance unto itself. Nearly two hundred twenty-six years after our foremothers and forefathers, we too declare our independence.

2) Describe the program. Please emphasize its creative elements. What is the innovation?

Project: EPIC REPUBLIC/ EPIC NATIONS

The greatest challenge our country has ever faced has been that of survival. Since the time of our nation's inception, we have defined ourselves as a Union, however, that has only gone so far as to express that we are associated entities. Individuals and jurisdictions of the United States have never fully worked together as one mind as would be evident in a perfect and ideal world. And more to the fact, the world is not always ideal, nor is the world a perfect place, yet, America is clearly rooted in the highest conceivable ideal being Freedom. Life, liberty and the pursuit of happiness are the freedoms with which we as citizens hope. Nonetheless, the Union has never been a completely honest alliance. In what could be the true golden age beyond post-industrial revolution and the modern world, our 2002 A.D. assembly of delegates, which consists of representatives from all strata, seeks to manifest a new United States paradigm. Without this paradigm, it is our belief that our great nation will be at loss.

Through the most highly advanced research in areas such as Analysis, Data Integration, Futurology, Quantum Mechanics, Super Computing, among others, in addition to utilizing every known open source of world knowledge, in concert with culminated, advanced intelligence estimates and working with some of the most brilliant members of academia, we are able to project certain instances with one hundred percent accuracy. We are geeks and as a result of our cursed discipline, we unfortunately and often know certain things that less than one percentile of the total world population knows. As sad as it was, we were able to predict to within approximately two weeks preceding the September 2001 terrorist attacks that a strike was absolutely imminent. This strongly guarded information is currently kept encapsulated on cached internet file for the purpose of examination, and had been published to some degree in government, throughout various levels of the academic world and within certain restricted areas of the media. As is often the case, and in the scope of this particular scenario, it is fair to say that less than a few listened to what many cynics have come to consider an "Electronic Pearl Harbor."

Recently obtained information substantiates that had someone in the proper authority taken seriously our reports of an inevitable terrorist strike, such attacks could have been countered.

3) What problem(s) does your program address?

Addressed are antithesis, bureaucracy, lack of conceptual growth, corruption in society and government, societal breakdown, insurgency and war. Our earth-shattering analysis proves what others are afraid to admit and what few people in the world at this time really know and that is:

a. Domestic terrorism, internal U.S. information warfare and U.S. cyber warfare are equally and often more damaging than the recent attacks of 9/11.

b. We have identified domestic terrorists operating within the confines of the United States that are equally as dangerous as international terrorists and in

many cases, more dangerous, but as a result of the current mind state of the average citizen as well as policymaker, nothing is being done by the multitude of those charged with being responsible to prevent these very specific kinds of present attacks.

c. Threats to the national security in any country do not always come in the form of highly visible terrorist attacks. False imprisonment and deception and denial are two catastrophic evils mitigated by the corrupt element of our global society. As we have seen throughout world history and since the beginning of time, this ultimately leads to all out war. Humans to alleviate these societal ills have instituted bureaucracies, but these same systems of checks and balances are dually used as devices to suppress our very existence. The greatest danger is that these mechanisms become the ultimate antithesis of life itself--The same ancient Tyranny, which continues and tremendously increases as modern civilization advances.

4) Cite the best verifiable evidence of the most significant achievements of the program.

As the ever-widening gap between rich and poor increases exponentially, so too does the chasm become greater between government and the public. Thus, our delegation follows in the footsteps of George Washington as well as General William Donovan and his Office of Strategic Services (OSS). Our Generation X defies Old World and New World belief that our generation has not manifested what is ideally becoming of a youth and young adult society. Our nonpartisan committee destroys long held stereotypes. What we have done for America is create a new government agency and institution as per the Declaration of Independence of 1776. It has been our right as U.S. citizens to abolish corruption, which surrounds us and replace the destructive government element with that of a new and just government system. Our battle reinvigorates those who have become despondent apparently beyond the help of science as well as those who have been undeservedly disenfranchised. We have been forced to war in our own country and thus to ensure order in chaos we fight to change our government for causes that are clearly neither light, nor transient.

As a product of the New World security challenge, we make world history. Furthermore, notwithstanding the global, multidimensional, multifaceted, security challenge our country faces, there is zero room for error. Therefore, our country has but one chance for redemption. Our assembly's platform unifies never before connected elements of government and directs at-risk citizens to government and military recruiters and other such programs.

5) Who are the current and potential beneficiaries of the program? What are the direct or indirect benefits to citizens?

We created a new U.S. national security system. The current and direct beneficiaries of this program are children. The Epic Republic is continued by custodians of the United States defense, security, and Intelligence Community both military and civilian who carry the flame for the present and future generations. What our committee proposes has never previously been achieved during the existence of the United States. Indirect beneficiaries are world citizens outside the United States affected by insurgency. What we have done for America is transform our country's highest held ideal from a mere

subjective concept to reality.

Our agency is responsible for and tasked with rapidly identifying emerging methodologies of information/ cyber-warfare targeting the United States and its allies as related to national/ international security, and subsequently implementing countermeasures. Our duty and service is to interpret and define so-called "gray-areas" (example computer laws) while enforcing international law. This program creates liaison as never before among civilian and non-civilian, government and Intelligence Community members and allows for the instantaneous intergovernmental exchange of ever increasing cyber warfare data in the private, commercial and government sectors, thus providing for crucial national defense and strengthening U.S. security infrastructure. This is the pinnacle of government interoperability.

6) How replicable is the program or aspects thereof? What obstacles might others encounter?

For the purpose of our Harvard University Innovation In American Government Congress, the official title of our initiative shall be "Union Alliance Collective Security-Redemption Agreement 2003/Project: Epic Republic." Epic Republic in no way denotes the Republican Party in particular as our delegation respects all parties deserving respect. We are members of all political parties that have the utmost respect for the United States and our country's time-honored way of life.

The Union Alliance Collective Security-Redemption Agreement by the People core mission is "Collective Security" as mentioned by William A. Mclenaghan in Magruder's American Government 1998: "...Basic purpose of the U.N. and a major goal of American foreign policy (is) to create a worldwide system in which all or most nations agree to take joint action to meet any threat to or breach of international peace."

Our system offers the ultimate in replicability. Every citizen young and old is given an opportunity. The minds of many senior citizens are put at ease. Obstacles encountered are typically self-defeatism by individuals and groups. However, this 21st Century American Renaissance of ideas and Arts and Sciences brings new light to what has been darkness. We are left with only one chance to redeem our society and to make right what has been made wrong.

Given our warfighting campaign, advances in knowledge systems, and in general, the evolution of the human mind, new ways of thinking are transferred. The entire geopolitical landscape shifts.

A new private sector intelligence network to be governed by Congress as authorized by United States Code (U.S.C.) has been formed and an independent agency that will be shared equally by both civilian specialists and DOD/Department of Defense military personnel. The preceding should be in accordance with guidelines set forth by DoD Directive 1400.35, "Defense Civilian Intelligence Personnel System (DCIPS)", 03/19/1999, which is responsible for the establishment of the Defense Civilian Intelligence Board

(DCIB). Information accrued by this new agency is to be strictly disseminated among eligible federal, independent, city, state, and local networks as well as specified foreign government alliances.

Related functions are: Counter-Intelligence (CI)/Counter-Terrorism (CT), Research and Development, Cooperative Training, Breakthrough Science & Technology Integration, Advanced Technology Finding, Discovery Navigation, and C4ISR (Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance).

Vast and complex government systems (e.g., communication) are streamlined...All systems unified.

This Creates Maximum Interoperability As Never Before In U.S. History

Civilian, non-civilian prodigies, and elite warfighters working together –

The world's most highly disciplined men and women, young and old, who have dedicated their lives far beyond the call of duty

Defense Security Intelligence Network Mission Reiterated -- Protect America At All Costs

Even Years Preceding 9/11
This Has Been Our Aim

Corporate Aspects – Lucrative Commerce for America's Defense

If more businesses donated funds toward areas that lack within our national security structure, the U.S. and world as a whole would be a much safer place. AONN DSI is a special independent agency tasked with a multitude of U.S. national responsibilities. AONN DSI is a commercial *and* government entity. **What began as a military families organization** is now **a federal trading partner** registered with the United States Department of Defense and the Defense Logistics Agency. AONN DSI is somewhat similar to other security agencies that are operated by civilian specialists working with military personnel. However, the AONN DSI federal enterprise is very much like that of the Amtrak government corporate model. Amtrak, preceding the U.S. Interstate Highway

System, and later, the Internet, is an extraordinary U.S. institution honored for the creation of the first corporation.

Parallel In Some Respect...But Quite Different

Following in the footsteps of George Washington and William General Donovan's Office of Strategic Services (OSS), prodigies from a number of advanced fields created AONN DSI as a means by which to bridge the gap as never before between the public and government sectors. Many a citizen had talked about doing such, but AONN DSI gathered the courage and actually did it. Far from the nation's Capitol, the U.S. West Coast had during the late Twentieth Century experienced a political landscape far worse than the First American Civil War. Often there had been little or no oversight and major sectors were left to be terrorized by corruption run rampant.

It has been said that some experienced living conditions roughly five times worse than the Great Depression, which is clearly the greatest travesty of American Justice and Liberty alike. Countless citizens were never allowed the freedoms all Americans were supposed to be born with. The ultimate injustice was that like the first Americans who had fled from the British tyranny, U.S. citizens west of Washington D.C., were again being robbed of their Constitutional Rights and dehumanized nearly two hundred years after the Declaration of Independence. So, in order to protect the New World colonies from a future tyranny, an elite delegation of scientists and warfighters assembled to draft a new national security plan to be revealed and exhibited at Harvard University John F. Kennedy School of Government during 2nd quarter 2002. The combined defense security intelligence network system was created to help protect all law-abiding citizens, as a tribute to American innovation such as its predecessor innovations throughout the centuries and to pay homage to those who undeservedly lost their lives in what has in reality been an ongoing civil war since our nation's inception.

Faced with a new global threat as well as increased domestic terror, Pacific Rim citizens rose up out of the flames to become AONN/Access One Network Northwest DSI, one of the world's most elite counterintelligence networks. Having fought since before the days leading up to what many citizens were being told was the end of the Cold War, the Network had encountered terrorism and political turmoil decades before 11 September 2001.

AONN analysts are soldiers for a good cause. They are the most highly trained assets having diligently studied some of the best intelligence professionals from the United States and around the world. AONN analysts work with scientists and analysts, armed enforcement and officials from many different agencies. AONN analysts report to duty around the clock while working global operations in multiple time zones. They submit reports from their tasking and serve their country both indefinitely and unconditionally. It

is through both deductive and inductive reasoning that AONN Analysts have extrapolated applicable concepts that even some senior officials have never conceived. This is a lifelong dedication to the fight for security of a potentially free world.

AONN DSI is competitive and elects from among the best and the brightest. AONN DSI is comprised of prodigies in less than one percentile.

Intelligence Sharing/Customer Service

National to International Assessment, Estimates/Requirements and Logistics
Preparation of Collection Plan, World Targets and Tactical Posture
Enemy/Threat Identification/Location, Capability, Intention and Overall Power

DSIN collects, processes, warehouses, permanently archives and disseminates information, which affects society as a whole, but that ninety-nine point nine percent of the world won't hear about in the news or find on the World Wide Web. Being that the Network is a multi-agency, joint-counterstrike force and possesses such a culmination of some of the world's brightest and most brilliant intellect, intelligentsia, academicians and minds, it can quite easily be said that the AONN DSI concept by itself is worth multibillions. AONN DSI is incredibly charismatic. Our intelligence officials are expert powerbrokers capable of almost unimaginable negotiation skills. One scenario is that in a friendly foreign sector in need of highly advanced anti-satellite defense systems and related satellite communications hardware and software, DSIN has the inside track, top analytical support and means with which to obtain and secure said equipment for our customers for the lowest possible price on the planet. DSIN has access and the powerful capability to seamlessly mitigate millions of dollars worth of sensitive data at a lower than wholesale cost in exchange for twice that which our agency spent. As one can simply deduce, millions of dollars can be accumulated in a brief matter of moments. Our officers are specially trained to get information from point A to point B and do so in the midst of chaos. We make perfect sense in a world fraught with disinformation. We are tasked to find and annihilate denial and deception operations. Conversely, we help to get our customers' ideas across ...and that often means across borders.

Issuance of Advisories and Notification of Ready (i.e., Open, Go, Standby) Status to All Agencies of a Common Concern

Our Advanced Analytic Production and Service of Intelligence (**A2PSI**) to government, the American people and larger world community, accrues capital by increasing society's educated awareness of government programs and related resources. DSI/N is computerized as well as fully automated to meet the ever-growing 21st Century needs of our customers who are the policymakers and decision makers of the U.S. Government and friendly nations. DSIN disseminates accurate and timely intelligence reports in support of all levels of command.

“Around the Clock In Multiple Time Zones” Further Defined

AONN DSI maintains an ultra-sophisticated 50-state and foreign database of government, military, political and commercial/private-sector assets. Our intelligence data come from both open and extrapolated closed sources, as we are naturally aware in our dynamic Earth system. We provide liaison, world-class consulting and accomplish what others cannot. Our task is astronomically difficult and it is for the security of the People and the future continuity of U.S. Government foundation, that we hold to the highest American ideal. The craft of espionage predates modern times and is found in case history throughout the Bible and in the formation of the United States itself. Secrecy is golden, an art, science, catalyst for positive change, and central to our collective civilization, history and evolution as an industrialized nation.

Modern Civil / Geopolitical War

It has been said that the CIA is in fact, not a product of the Cold War, but rather it is more than anything, a bi-product of World War II. AONN DSI clandestine lineage to and division of the Intelligence Community, on the other hand, is very much a product of the '70s, '80s and '90s and what our analysts consider to clearly be an extended and ongoing Cold War. The truth is, we have always been at war even at home within our own cities and communities in the United States. Furthermore, our agency understands that there has always been a state of constant war of good vs. evil and that nearly every city, township, state, province and nation during every era throughout time, has experienced some kind of civil/political war in spite of history books not particularly having reflected or documented such.

Perfect for the Economy

AONN DSI will extend itself to share in, on the average, \$250,000 worth of government contracts with financiers. DSI will agree to terms of split payment on contract disbursements. Allotment can be considerably larger ranging from \$250,000 to several millions or even several billions for that matter. Confidentiality depends on the nature of the business/partner program, however it can clearly be stated that AONN has created a robust system of defense monetary fundraising via a mechanism of discreet apportionment. More simply put, our formula is coded—multidimensionally encrypted.

Network Summary

AONN DSI is integral to the ultimate American advocacy and has lobbied Congress to implement this new system of ensuring public safety as part of the Homeland Security umbrella.

- AONN is a much needed source of intelligence information
- We are partially a student/civilian agency – our profile has been made available to the public
- Our agency has discovered and consequently turned over countless intelligence loopholes for examination
- Under Public Law we clearly have the authority to police our communities despite any conceivable challenge(s) to our status, especially in lieu of the

Pacific Northwest's previous zero-oversight and severe breaches of U.S. Constitutional Law

- AONN is encouraged by other agencies to continue its effort as it is the ultimate testament to the notion that the system can work even despite mass corruption
- AONN will generate massive funds for the U.S. by increasing public awareness of government resources
- AONN spends time and money with Uncle Sam to help finance U.S. defense programs
- The Management & Governance -- Intergovernmental relations & collaboration program "AONN U.S. Defense Security Intelligence Service" was officially made public domain at approximately 8:00 PM (EST)/ 5:00 PM (PST) on Friday, May 17, through the Institute for Government Innovations 2002/John F. Kennedy School of Government at Harvard University

Excerpt from Both Public and Internal Disclosure

For Immediate Release:

Our agency is proud to support, unlike any other entity in world history, the various defense, security and Intelligence Community member organizations of the United States and Allied Nations and would like to take this time to thank the many of you working in academia, policy and private sectors who have helped to assist in the transition from Research & Analysis to public domain. Thank you.

Respectfully Yours,

CIO Robert L. Taylor / Director of Operations / U.S. Policy Support
Information Directorate / AONN Defense Security Intelligence (DSI)
AONN Human Resources / Defense Programs Finance & Staffing Division

Your organization is more than welcome to contact us at any time.

"Some say intelligence gatherers or spies come from the most unlikely backgrounds, and I guess that applies to me. Throughout history you will see men and women from many backgrounds step forward to serve their country in this particular way, and I was no exception."

Words by Nathan Hale from CIA website: <http://www.cia.gov/cia/ciakids/history/nathan.html>

Finally, despite all the atrocities we have observed and experienced, incredibly, we the cooperative People of the downtrodden communities of the United States of America, lower our weapons which have traditionally been used against ourselves as a society.

We do this so that all can come together from among every ethnic group to help as much as humanly possible to eradicate global corruption, terrorism and tyranny. We are forever tired of crime in our world.

There is no other program like this in existence. **Our new system transforms disestablishment and anti-government individuals into productive allies.**

We bring hope to those who have been without. Our battle reinvigorates those who have become despondent apparently beyond the help of science as well as those who have been undeservedly disenfranchised. Every citizen young and old is given an opportunity. New life energy is brought to America. The minds of many senior citizens are put at ease.

The spirit of Nathan Hale is reborn in 2002 A.D. ...

*Imagine an entire New World culture
and entire generations that seek to be like Nathan Hale*

...We rise up out of the flames – We are the People

Operation: Epic Republic – Union Alliance Collective Security Redemption Agreement

Signature Block
[CIO Robert Lee Taylor]
Robert Taylor,
Director.

For Comptrollers/ Senior Fiscal Budget Managers/ Congressional Budget Committee

Our agency is officially contacting you regarding our requirement to fulfill our fiscal year intelligence budget. FY 2003 funds will be allocated to offset the cost for a sufficient amount of DOD staff, surplus of analytical tools, and other such resources pertaining to U.S. legislative demand for upgraded counterintelligence product. Deployment of the Harvard University John F. Kennedy School of Government Union Alliance Collective Security-Redemption Agreement 2002/3 Project EPIC REPUBLIC/ EPIC NATIONS (UACS RA 2002/3) National Public Security System is both history making as well as essential to the survivability of the United States.

AONN U.S. Defense Security Intelligence Network is raising capital during 4th quarter 2002 for a total estimated budget of approximately \$50 million to be used primarily for the systems that pertain to our new cyber warfare base, complex, facility and center for the Pacific Northwest/Pacific Rim. This will forever change the computer industry as we know it and be the largest revolution in terms of high tech since the advent of the Microsoft Corporation.

Naturally, we continue to develop and pursue our agency's new and existing relationships, partnerships, and alliances in the academic, commercial, and private sectors. In 2002, AONN DSI/N has created the new U.S. National Public Security System (USNP2S).

Your contribution of an endowment, interagency transfer or grant is certainly more than well received and our agency greatly appreciates your ongoing effort to make for a considerably more effective means of U.S. national security.

Framework of the New United States National Public Security System:

- 1) The new national public security system hereinafter referred to as "USNP2S" is a partnership unlike any other in history, between government and the U.S. civilian population.

- 2) The new national public security system consists of three main elements: (a) advanced software protocol (b) a physical structure; and (c) legislation. These elements were brought together under a system that AONN/DSIN refers to as Union Alliance Collective

Security-Redemption Agreement (UACS/RA 2002/2003)/ Project: EPIC REPUBLIC/
EPIC NATIONS.

- 3) Like many advanced systems, USNP2S is a modular platform, which has the capability to be upgraded seamlessly.

- 4) Laws governing the use of USNP2S shall vary in contingency upon the jurisdiction in which the system is operating.

- 5) USNP2S was created chiefly by the private sector rather than the federal government, so that civilians could be afforded a means with which to help police their own communities in areas that severely lack crucial government oversight. USNP2S was created by the People to protect the People.

- 6) USNP2S is a logical system.

- 7) USNP2S is the system that both streamlines and defines the highly complex and interconnected systems of personal identification/visual recognition/biometrics/and other such systems. Therefore, USNP2S is the top tier system of systems with regard to U.S. national public security. Furthermore, USNP2S was created by the public (first and foremost), academia, the world scientific community, government defense analysts and finally, legislature. So, the system is always at least one step ahead of the competition in theory, design and operation. Research, Analysis and Deployment (RAD) is our business.

- 8) USNP2S to some degree mirrors some characteristics of other existing systems both domestic and foreign, but greatly improves upon them. USNP2S is 21st Century U.S. national security as never before. Our nation's critical infrastructures are strengthened exponentially.

- 9) USNP2S is integral to the survivability of the United States.

USNP2S identifies obscure but serious threats that could result in exceptionally grave damage to the nation. USNP2S is clearly not a national ID card.

DSIN preaches defense security intelligence so if you want for us to test your product(s) and materials, by all means send us something.

America Has Bred a New Super Force – A Soul Who Proposes a 16th Agency...

Can you imagine a special program, so incredibly powerful that it transforms, with one hundred percent accuracy and success even the most disestablishment individuals into die-hard pro-American advocates? Can you imagine a super formula that reverses long

held anti-American ideologies and creates soldiers who are forever for America? Imagine the fact that Virginia, which is the very heart of the Central Intelligence Agency, had once been part of the Confederacy. I refer to my formula as the “Future Colony Theory” based upon my twenty-six year study of the popular Star Trek science-fiction/fact series combined with Urban Intelligence.

SUMMARY:

Qualifying individuals from eligible organizations / components are invited to collaborate with AONN DSI at a new cyber security facility and annexed complexes. For invitees, we have listed:

(This list is in no way exhaustive. If you do not see your entity, please be advised that a reasonable number of eligible state, federal, military and cleared academic / civilian specialists are invited to participate in a Level 1 (Unclassified) DSI conference at a secure location. This initial meet for all listed components will in some cases be at various neutral locations separate from the main cyber security facility).

Congress – All U.S. Government executive branch departments and agencies – ATF/CIA/DIA/DEA/DSS/FBI/NSA – Office of the National Counterterrorism Executive – NIPC (National Infrastructure Protection Center – Bureau of Justice Assistance / RISS Center Services – The National Cybercrime Training Partnership (NCTP) – Homeland Security – NASA – Institute for Intergovernmental Research (IIR) / State and Local Anti-Terrorism Training (SLATT) Program – U.S. Marshals – U.S. Secret Service – Interpol and More

The calculated net effect of the AONN Information Security Infrastructure (AISI), reformation, and anti-crime measures in concert with said national security initiative, will be a shocking, never before seen, and absolutely drastic reduction in overall crime in the U.S.

AONN DSI operates over 2,040 contractors and network members in multiple global locations. Its annual budget is off the present record. Additionally, DSI/N seeks to increase its staff with considerably more DOD staff at approximately seventy percent.

Through Harvard University, our organization has created a program which allows for open air discussion between a very small, less than one percentile group of high-IQ individuals who have not so perfect offender records and government information security officials. There are relatively few, vaguely similar programs in existence and none of which are anywhere near comparable to our program. This new quantum formula that has been developed, is the most astounding and prolific compromise in recorded world history between civilian ex-underworld specialists and U.S. government. Said program titled “Project: **EPIC REPUBLIC**” **was created by and for government and it is the government that shall own such system.** As such, the government at its discretion may fund this program, however, this is not a service that is being sold to the government; this system is under government control. The chief feature of the newly created system is its ability to physically penetrate Al Qaeda and other terrorist cells operating within the United States and abroad.

Our portfolio of accomplishments has been disseminated as an official briefing to the President and Vice President of the United States, Congress and every major department in the national hierarchy. To this end, we have notified the White House, the State Department, FBI, FBI Counterintelligence, the Justice Department, Department of Defense, CIA, NSA, the entire Intelligence Community and the Office of Inspectors General. The AONN DSI new national security program was created for the People and government and is being exhibited at Harvard University John F. Kennedy School of Government/Institute for Government Innovation 2002. The same information has been provided to National Archives and Records Administration as well as the Federal Register.

Charter:

The AONN DSI/N Charter is clear – AONN DSI is a 24-hour data exchange system, of which the scope of the information is as William Webster indicated when he was referring to the CIA’s role in modern times. His words were: “...The scope of this information includes virtually every kind of information-information from all parts of the world-economic, political, military, scientific, information about people, places, and events; events that have happened and might happen-wars, coups, terrorist acts, crop failures, elections, famine, drug trafficking, and natural disasters...”

AONN DSI adds to this – Our core mission is to defend America’s streets and communities in areas where there has been little or no oversight, isolate and defeat terrorists domestic and foreign who are operating both in and out of cyberspace, expose corruption and extremely difficult to identify threats to the national security while implementing countermeasures to such, create new laws through legislation to protect

citizens, penetrate what have traditionally been nearly impenetrable networks and reform by means of altering previously criminal and anti-American ideologies.

Ancillary:

AONN DSI is the highly trained, ultra sophisticated, hands-on, hand-to-hand combat, cloak and dagger, spy hunter component of our nation's new logical defense system. The Pacific Northwest is full of intrigue and without an agency of this magnitude in our part of the world to coordinate with preexisting agencies in other parts of the country (e.g., D.C., Maryland, Virginia) our national-international system of living and way of life would unquestionably shutdown. AONN DSI has taken the lead. This is what America always wanted and needed.

Background:

Some of the examples contained herein may appear similar to certain elements found in a number of popular movies and books, therefore we would like to point out that in spite of such stories being fiction, such stories are often based on and/or depict a realistic counterpart, rather, an actual operation within the real world. Our real world program is clearly within the scope of the latter. Recent television shows have been "*Level 9*" and Ice T's "*Players*." Both shows relate to individuals on probation working for the FBI. Level 9 was centered in Seattle, Washington and dealt with hackers who had become counterintelligence operatives, and Players was in essence a parallel. More to the fact, it has been known for a considerable amount of time by information hounds in the public and private sector that these kinds of programs do in fact exist. Ordinarily, the rule of thumb to support this is that there is a logistical requirement to utilize underground talent when such talent is not available anywhere else. Furthermore, one should for the record note that in our particular situation there is no movie involved and our program is no laughing matter. We are considered to be geniuses in our respective areas of less than one percentile talent and our command is comprised of some of the world's most brilliant young adults ever in recorded history. AONN DSI has identified as well as tapped forms of human intelligence, which have not previously been classified. Emotional Intelligence is only one relatively recent classification though not by AONN DSI. It was AONN DSI that harnessed this.

Some of us had "run-ins" with the police when we were adolescents. Of any of our aggregate charges, the most serious allegation was that of first-degree residential burglary. But, there are no convicted killers, murderers, mad bombers, arsonists, gunmen, violent maniacs, drug dealers, or in fact, thieves in our network. There are no pending charges, investigations, or scandals. No. Our geek friends were penalized for such

offenses as “offensive littering” and “discharge of aerial devices after hours of dark” (in other words: fireworks); many of which were later dismissed. As such, the remaining absurd charges are still contested to this day. It is clear to many professionals that none of us are criminals, nor ever have been. As a result of demographics, rather, having grown up on our city’s unbalanced east side district where there is almost zero oversight and given the political tension and climate in our country during the era of the late 1980s to mid 1990s, our particular situation was circumstantial. Our particular situation was circumstantial to such a degree that several branches of the U.S. Armed Forces have remarked that of all our collective charges combined, the only charge that is remotely considered a slight barrier to enrollment in active military duty is the weak residential burglary allegation. The military has conceded that if this allegation, which recruiters know to be absolute nonsense, were officially reexamined by the courts and ultimately vacated, the promise of active duty would be one hundred percent guaranteed. The preceding political friction occurred more than seven years ago, and the military’s positive comments have been quite recent, more specifically, within the past six months. Additionally, our network associates are still in their mid-twenties.

Al Qaeda Connection:

While in college, some of our team had unfortunately encountered many Al Qaeda sympathizers as well as hardcore supporters. This was many years before most of the world population knew anything about such destructive groups. Our team had also the collegiate and institutional experience of living and studying among the Muslim community for a number of years. Later, as a result of industrial spying aimed against certain areas of Washington State’s High Technology Corridor and local businesses, some of our members had been forced as independents to perform intelligence collection within the larger international community.

Motivation:

**(Domestic Suicide Slow-to-Rapid Death Assassins
and Automatic Weaponry on U.S. Streets)**

The most shocking discovery made by any analyst who thoroughly examines DSI/N's civil service will undoubtedly be that the individual responsible for the creation of The Network is in fact, purely a valiant, humble and ultra-dedicated patriot who has gone light years above and beyond the call of civic duty. One will find the great paradox is such that despite what the "system" often and unfortunately contends, there are in reality, those among us who wish for nothing but economic, political and social global stability. There are elite warfighters for America who have been suppressed as a result of unfortunate circumstances. Moreover, virtually tens upon thousands of work hours have gone toward the mega formulation of what could very well be the most successful intelligence operation in United States history.

First, imagine the most unscrupulous popular entertainment figure currently in the media. Who would that be? Perhaps several subjects quickly come to mind. Imagine the trials and tribulations and societal destruction caused by any of these subjects' problematic campaigns. The courtroom dramas, the plight, the death, the carnage and the young minds lead astray in the opposite direction far from what our foremothers and forefathers had intended to be a perpetual ideal. The higher American ideal was to be carried on for thousands of years into the future. Second, it could easily be said that Generation X by itself has devolved in many respects. Human subjects' minds have closed off crucial hardware channels in effect sending the subjects back in time to prehistoric times and times of brutal "food-sex-shelter" savagery. The now popular practice of youth smoking "wet" or "sherm stick" (PCP or embalming fluid laced cigarettes and marijuana joints), which begets incredibly super human strength and often-vicious suicide attacks against civilization and humanity is clearly a threat to the national security. This absolutely deadly concoction creates true-to-life, nothing to lose zombies, that in many cases are armed with semi-automatic to automatic sidearms and sub-machine pistols, while seemingly invincible. The general public is only now beginning to receive obscure reports about such incidents, but there remains a massive gap of information. Ordinarily, a neighborhood of underprivileged youth will receive tips through the grapevine of news reports involving someone who apparently possessed super human strength and it will be these underprivileged youth who know what police and investigators have no clue about. There will be speculation that the individual gone mad had a history of duress and mental anguish and that a toxicology report is on its way. But, sets of ghetto inhabitants already know what the forensics experts do not. There is also a related scenario in which a subject who is a reputed gang member will ingest wet (also "hit" "take a hit of" "pull" or "take a drag of" the marijuana or tobacco; a marijuana joint rolled with a cigar is commonly known as a blunt) in order to conduct a gun blazing suicide mission/operation against a rival sector/criminal or legitimate monetary operation. When the strike is against a legitimate business owner or team of business people, the all out assault is committed in a blind rage out of jealousy, envy and thus pure hatred. Because this usually happens without warning and due to the extreme nature of this type of domestic gradual-to-rapid suicide ritual, it would seem that nothing short of heavy caliber return gun fire can stop the onslaught and attack. Police authorities and communities are not prepared for this sort of thing. Historically, there have been countless cases of assassins of this order having been pumped and sprayed full of bullets by police and tactical teams, but having remained somehow functioning and armed at a maximum level of lethality.

Induced subjects have awakened the next morning and subsequently died instantly. This might seem like something only of horror movies, but it is not. This has become a terrifying daily reality. AONN DSI through deep analysis and honesty, reports through intelligence channels to the President of the United States, policymakers and the American people, the truth that suicide attacks which so-called experts allege are making their way to the U.S., are in fact already here. AONN DSI is the first to report this in this light. Suicide attacks are not limited to Al Qaeda operatives, but are a bi-product of an overall demoralization in our society coupled with anti-Americanism. Third, AIDS and other epidemics are notably threats to national-international security, but equally and increasingly anti-American sentiment is by far a most serious and impending threat to both domestic and global security. Finally, it is through the use of our super formula in carefully designed and strategically engineered mainstream music created by our beyond state of the art, DSI Clandestine Science Branch that the spirit of early American colonization, empowerment and pro-establishment/pro-state ideology is conjured in the minds of the youth, young adult and global consumer masses. The same zeal with which George Washington fought the British while instilling the first American blueprint is brought back through space-time into the year 2002 A.D. All the kindred spirits have been rallied and conjured to help fight to save our future. Nathan Hale lives!

This is all too elaborate, too intricate and too real to be a hoax. With the lure of earthly pleasures, no one or group would have gone to such an extent to create such a story. It all checks out and one might as well call it paranormal. But still—could it have been someone with some kind of dissociative identity disorder? Think again. How about immeasurable genius? How about it's the real thing? We often ask ourselves how is it possible. The only thing that we can surmise – is that it *is* possible.

Does the criminal element write and compose eloquent prose, dissertation, and beyond Ph.D. level lecture for Harvard University? Sure, it can be said that one of our country's most notorious serial killers was at some point a law student, but then it can be asked, "Was he a renown poet or a romantic lover?" Was he ever a true patriot? Did this person over the span of fourteen years or more, create a highly advanced new national security protocol and volunteer to work constructively with police, law enforcement, security, intelligence and defense communities? – Of course not.

Parallel Worlds

According to author James Bamford in his 1982 national best selling book (Houghton Mifflin Company/Penguin Books; ISBN 0 14 00.6748 5) *The Puzzle Palace – Inside the National Security Agency, America's Most Secret Intelligence Organization*, The Black Chamber was created on November 4, 1952. Mr. Bamford illustrates that the new agency did not appear in the Federal Register, Government Organization Manual, or the Congressional Record. Further, he wrote: "No statute establishes the NSA," former

Senate Intelligence Committee Chairman Frank Church reported,” or defines the permissible scope of its responsibilities.” On page 24 James Bamford indicated: “The proposal also specified that the organization be composed of a civilians...”

AONN DSI was created out of absolute necessity. One cannot claim to be intelligent and at the same time be hypocritical in that he or she believes the current system to be absolute. That would be the anti-thesis and a defeat to the purpose of the American system. The creators of early America were fugitives and members of penal colonies. They were American revolutionary soldiers. The *Scottish* John Paul Jones was a founder of the United States Navy. Scholars now know that Columbus *wasn't* liked by his subordinates, died a miserable death and that he wasn't really a hero. **In the case of the Black Chamber the powers that were, brokered highly illegal deals with the entire cable industry in order to tap international data traffic.** Despite the surreptitious nature of the aforementioned, it is all real. It really happened and it was all done. Less than one year ago, no one would have believed that there would ever be a new department of government. Officials at the Pentagon would have dismissed this to their hearts' content. Cynical analysts would ramble on rationalizing about how it was impossible – impossible – impossible. War and Congressional approval weren't the only reasons for the creation of Homeland Security – it was on smart peoples' minds a long time ago. **Therefore, do we always first need to have a war, or a presidential go ahead, or Congressional signature, or Secretary of Defense authorization in order to save the world from destruction?** Every time there is a new agency, the same things are iterated and reiterated. Then, once a new agency is in place and official with charter **it is said that the newer system is absolute and nothing shall ever be added to it or taken away from such... ..but geniuses need to constantly remind the rest of the world that things are dynamic, not static, ever changing, things change and that things are not absolute** and that also goes for the Department of Defense. Does anyone remember any old stories about something called a “War Department?”

Do we as a community of intelligent people think that CIA and NSA are complete? Do we fall for the deadly illusion that President Harry S. Truman made everything ok when he writ that intelligence be centralized? Does everything stop there at his ancient declaration? In all its majestic worth and subsequent account for trillions of dollars spent, was the new system able to locate one man? Could one human size object – one subject – one human – be located in space-time? No. So centralizing intelligence information wasn't the total solution was it? It isn't currently the total solution is it? So please do not make the mistake of thinking that no other defense *agency* (not “department” as in the Department of Homeland Defense – “agency” is the operative word here – pun might as well be intended) can be created and added to what already exists or that a civilian with the mind of a master military strategist can't come up with the idea. **With all due respect, there obviously weren't enough systems (e.g., defense agencies) in the first place. It has to start somewhere, someone has to have the courage to start it,** and in this case, it came from the ghetto where a number of heroes such as Colin Powell have emerged.

If some poor kid who lived in an area that had been ravaged five times worse than the Great Depression, sold a bag of cocaine so that he could buy a decent meal was arrested on a drug possession charge and sentenced to one year and one day in prison, awoke in his cell from a bad dream one day and was suddenly a visionary and clearly in some manner of clairvoyance and perfect clarity, saw (remote viewed) in his mind's eye, bin Laden and his comrades' actual whereabouts at some remote location and this could be confirmed, that kid would become the exception to the rule and would immediately be released from state custody... ..into the hands of the federal government of course. But, the point to the obviously intended run-on is that the kid would be released from his previously downtrodden predicament.

Objective Government Business, But It Can Be Explained No Other Way --

Analogy of Good vs. Evil

When referring to Al Qaeda, our U.S. leaders have frequently used the term “evil” clearly denoting the opposite of “good.” Without a shadow of a doubt, and it is known to every analyst, that this suggests nothing other than good vs. evil and furthermore, spiritual warfare. Have we ever heard the saying “In God we trust” or “One nation under God?” We point out that AONN DSI strongly believes in upholding the law of the separation of church and state. Nevertheless, for the purpose of expounding upon such evil, we depict the current global situation in a related analogy. Proponent countries and their respective nation-state members have periodically referred to America as the Great Satan. Being that America was quite conversely founded upon certain other moral grounds, we as intelligence professionals, analysts, experts and officials feel that it is only right and well within our legal jurisdiction to reply to the Great Satan comment and in doing so, examine what we consider to be displaced blame. We can no longer tip toe around on eggshells and sit back without at least responding to such claims in an unbiased, non-discriminatory and perfectly legal manner. In a street sense we can't let someone “punk” us when the fate of the world is at stake, so it is the duty of every man, woman and child in the United States to get behind and back the astutely polite government when we see that it is being cheap shot at and blindsided. Moreover, war calls for exceptions to rules and is fraught with special cases. Equating Al Qaeda to the devil in no way shape or form insinuates that the Muslim world is of the nature of the devil. Al Qaeda has proved to *not* be a civilized entity whereas the centuries old religion of Islam *has* proved to be peaceful, civilized and “not of the devil.” America welcomes and is a collective of and based upon all world religions, but needless to say, America does not tolerate terrorism.

The Network and Its Clandestine Operations – AONN Special Access Project:

Colossal historic milestones can for good reasons sound like marketing pitches, but this interstellar gesture is no more for-profit than the Amtrak Corporation and railroad system. Our tactical message is mixed in with on-the-surface-and-at-first-glance-illicit mainstream multimedia. **This is no different than an optional Rated-R program (e.g., movie, song, television show, or music video) on the Armed Forces Broadcast System.** From there, we cast a “honey net” which is a data trap for terrorists both foreign and domestic. The entire ongoing operation is highly monitored. **We are able to communicate with every conceivable organization via a fifty-state and foreign territories database.** As the NSA admits, if it (NSA) were a publicly traded entity, it would easily be a Fortune 5 (not 500) company. Perhaps NSA could be Fortune 1. Imagine being able to go back in time to the beginning of the NSA knowing what you know now. Imagine the fact that there is a saying the information has a tendency to come from the east and travels west ...well so does time. **On the surface Washington State is plush-green and glittering with the intergalactic accomplishments of post-modern industrialization.** Washington State has become the New Silicon Valley. However, socially and politically, Washington State is still in the midst of the American Civil War. The Outlands of the Emerald City are medieval and perilous. In Washington State there has come to be an **Outer Network** as the landscape is reminiscent of the famed movie *Blade Runner*. The State of Washington is eerily another Washington with its own parallel universe Wild Bills and Jesus Angletons. OSS was just created, but in a different time in the larger continuum. AONN DSI is an intelligence service, therefore its personnel do not play games, but there is in fact a popular role-playing game (RPG) indigenous to Washington State known as *Shadow Run*. The *X-Files* were also filmed here and there is nothing funny about this. Art imitates life and for whatever reason, in the cosmic scheme of things, the other Washington has come to be not only a **dark parallel of the nation’s capitol**, but also the world center of paranormal activity. Washington State is officially known as “Absolute Ground Zero.”

How in the did Washington State become headquarters for the Grand Wizard of the KKK if the Ku Klux Klan was formed thousands of miles away in the southern state of Tennessee? The State of Washington is also known as the Ring of Fire. And you question whether the Civil War and Nazi threat really ended? **Some of Washington’s suburbs as well as politics now resemble East Germany before the fall of the Berlin Wall.** Throw in Washington State as being the High Technology Capital of Earth and the fact that it is a test-bed for groundbreaking surveillance and law enforcement technologies and you have George Orwell’s “1984” in 2002 beginning this quarter. This is no joke and no theory. The Seattle Mariners’ winning streak may give the impression that sun, fun, warmth and laughter abound, but ye do not be fooled by the willow wisp of the mirage. **Three quarters of the year our world is battle ship gray and rain-hail-sleet-storm-black.**

It has been said in theological context that the elusive devil would eventually set his last campaign to the world through music, so for the purpose of our illustrating our notion we will assume the devil is a real entity. **Assuming evil exists, our goal is to send our top**

agents who have experienced first hand some of the deepest known sectors of the dark side, through space-time to meet and do battle head on with the “devil’s” massive and asymmetric army in cyberspace and beyond.

We know from actual experience that Al Qaeda youth sympathizers and other anti-American, militant, domestic youth and foreign militant nationalities listen to and are driven by what they believe to be extremely lyrical, rebellious and subversive music by America’s own seemingly counterculture.

Continental Army 2002 – A New Generation...A New Kind of War –

In a Dark Sector Unfortunately “Scouted” Previously, AONN Leads the Way

It is known within the Agency’s Directorate of Science and Technology as it is indicated in the paragraph under the heading “Future Challenges” in Rick Yannuzzi’s article (Copyright 2000 The Joint Military Intelligence College; ISSN 1061-6845) located at <http://www.cia.gov/cia/publications/inqtel/> that parent entities no longer possess the dynamic traits of their offspring.

The Network is capable of penetrating the most dangerous sectors and hostile environments on Earth. AONN DSI clearly created and operates a beyond incredible system, which fuses IT with cloak and dagger defense security intelligence methods and sources. AONN DSI is receiving hands down applause for its extraordinary and earth-shattering breakthroughs. AONN DSI is mobilized to advocate your institution as it possesses the agility, speed, and most sought after element of sacred fire, which fights all fires.

<http://www.aonn.gov>

The AONN U.S. **Defense Security Intelligence Network** national security program is an **advanced modular platform** created by “new math” defense analysts and can be used to both secure and fulfill any conceivable requirement. **Project EPIC REPUBLIC/ EPIC NATIONS** being the most favorable and logical U.S. defense strategy deployed in response to necessity can be accepted without red tape discussion written or oral. This quantum project was designed in accordance with FAR 15.414 such that Standard Form 33 may be authenticated and transmitted to any department, component, agency or service creating a binding agreement.

Quite different from traditional and often laborious methods of national defense, the AONN beyond state-of-the-art approach streamlines vast government information systems and allows for end product to be delivered in a mere fraction of the normal continuum of space-time.

Clearly, Project EPIC REPUBLIC/ EPIC NATIONS unifies all U.S. defense-security-intelligence networks and thereby creates a never before achieved join-military/ civilian national strategy.

“Our paradigm *is* the true security of the United States as it is *our* generation that has been left with the keys.”

**AONN Union Alliance Collective Security-Redemption Agreement 2003/

"#1 PC Security Group McAfee Corporation Enters Into New Powerful Relationship w/AONN"

Access One Network Northwest/AONN

AONN Transcript of Portfolio

AONN partners with the **#1 personal computer security company in the United States**, which accounted for **\$834 million in FY 2001 revenues**:

AONN/Access One Network Northwest has for its portfolio:

Worldwide distribution of compact discs and other products available in brick and mortar retail outlets

Certified platinum artists signed to the multimedia group

Creation of a platform to support major multimedia productions

A music and digital television network on which Former President Bill Clinton appeared while in Seattle; This network is moving to satellite broadcast to be available in roughly 130 countries

A high powered and specialized legal team

A full-on IT division capable of providing any conceivable product or service in the world of computer

and Information Technologies

An emerging and expensive clothing line with product now available

An impressive U.S. Defense platform for security reformation

. Over 100 companies in the network

A high profile, interview published by famous author and former Hollywood Foreign Film Press President/Golden Globe Awards administrator, Marianne Ruuth; Ms. Ruuth is recognized as having authored the biographies of Oprah Winfrey and Bill Cosby, as well as the biographies of many other celebrities and dignitaries world renown.

. Sponsorship by major U.S. corporations and involvement in respective corporate campaigns

Excerpt from NAI portfolio:

“NAI Labs

All Network Associates products are supported by the NAI Labs advanced research division. NAI Labs has an international reputation for excellence as a premiere advanced research organization, gained through cutting edge research into emerging, complex computer and network security issues. NAI Labs is comprised of more than 100 dedicated scientific and academic professionals in four locations in the Unites States, and is **entirely funded by government agencies such as: the Department of Defense's (DoD) Defense Advanced Research Projects Agency (DARPA), the National Security Agency (NSA), and the United States Army. NAI Labs is one of the leading recipients of DARPA contract awards in the area of information security.** Government contract obligations enhance the requirement for technology transfer at NAI Labs, which feeds the results of its research into the product development process to further supplement mainstream network security solutions made available to the private sector.

Currently, NAI Labs is conducting research in the areas of network security, cryptographic technologies, security architecture, methodology, engineering, infrastructure, secure execution environments, adaptive network defense, distributed systems security, information assurance science and engineering, as well as internal research and development.”

Hi Robert,

“We have a tremendous Executive Team in place with a lot of Channel experience, and we are focused on our partnerships. It sounds like we will work well together, and I look forward to the partnership.

Please let me know what time would be best for you in February, morning would be best if possible.” –Best Regards

McAfee is considered to be the #1 domestic antivirus software developer in the world. Please note that our executive summary and business plan are extraordinary. Our software project and related proposal have been recognized by a computer industry leader, and to begin, an endeavor of this magnitude is estimated to be worth tens of millions of dollars. We emphasize that the initial revenues generated are only the first in a beginning series of snowball-effect rounds of funding and sales. We look forward to a positive response from XXXXXX as we have done our homework. Thank you.

>Hi there!

>

>This is just an informational email to make you aware that I am discussing a potential opportunity with Robert Taylor of AONN, as a result of McAfee.com's relationship with MP3.com. McAfee.com recently did a promotion with MP3.com wherein we licensed music for a special offer we created for those who purchased our product. I developed that relationship and manage the program. The response was excellent, such that we are continuing the relationship. AONN owned one or more of those licensed songs.

I didn't actually hear the material myself, **but I do know that enough people were intrigued with the offer enough to purchase our product.** As a result of this relationship, I am now looking into the proposal sent to me by Mr. Taylor.

>Thanks very much,

>

AONN News and Financial Update for Tuesday January 8, 2002

In the third week of December 2001, Access One Network Northwest IT conglomerate/ multimedia division AONN Records had received a first suggested preliminary offer of \$6 million at 10% investor ownership. Based on the rendered model, such contract would equate to roughly 90% government ownership in addition to the hypothetical 10% to total 100% government and publicly controlled interests in the company. Clearly, that was only the beginning of round-2 finance for the company as AONN Records proceeded to resume negotiations starting second week January 2002. Analysts have indicated that total acquisition is estimated to be worth several billion dollars.

To All Eligible Agencies and Concerns:

"We will raise \$50 million from either the private or military/defense sector if your entity can match that amount of capital for a total of \$100 million, and naturally, DSI Service will agree to and be more than willing to share in the allocation of funds. We work actively with paid attorneys and a specialized legal team, which consists of licensing agents to officially secure any conceivable contract. Further, DSI/N has already paid for 1 full-year of AT&T Broadband television advertising."

The Network is a highly connected and very influential Northwest multimedia conglomerate, which serves as a counterintelligence multi-platform. DSI/N has connected to every conceivable U.S. defense/ intelligence organization on Earth and in space.

Press Releases w/Advanced Profiles of AONN

RE: AONN Records--4th Quarter 2001

(Addressed to XXXXXX Regarding Upcoming Contest)

To Whom It May Concern:

Please read the final draft and updated cover letter with all its added components. Thank you.

35,000 Projekt N12 singles paid for and coming from corporate powerhouse Kenwood USA

My understanding is that your agency is in the business of brokering deals. The AONN Records story is epic and as such, the company should showcase to the A&R world the best in unsigned talent. AONN Records roster has already accomplished more than other independents on the verge of achieving worldwide, major label status, unheard of and record breaking feats and has done so all without an AONN Records website – other than the space that The Network rents from mp3.com. AONN Records maintains over 100 elite artists including some gold and platinum who have in the wake of Seattle grunge, adamantly signed to the megalithic Northwest roster. AONN Records took over numerous West Coast management collectives, has been thrifty with use of resources and is almost a multi-billion dollar operation with zero debt. AONN is almost its own major label. Can you imagine such an operation? The shrewd and diabolical business savvy backed up by information soldiers mixed with every conceivable musical genre taking a political stance such that adult contemporary/r&b and rock gel along with electronica in the high-technology capital of planet earth--Washington State. AONN Records both respects and pays homage to its controversial however successful and pioneering more than half-billion-dollar making California neighbors whose footsteps the label humbly followed in...

Kenwood USA has gotten behind AONN Records and paid for 35,000 CD singles from AONN's November 12 Projekt. In the contract that AONN Records signed for this, the singles are guaranteed to move through Kenwood distribution channels -- guaranteed. Everything has been taken out of our hands. The CD has been paid for, is certifiable and verifiable. Since it is Kenwood behind the release and a super advertisement, every single is considered already moved. The singles are promotional being coupled with the sell of stereos, which is a unique and incredibly powerful marketing plan.

AONN Records knows that when the majors launch 10 titles, typically 1 of the 10 is successful, consequently paying for the 9 that were not. Of the titles that are test marketed, even the major labels do not press as many as 35,000 pieces. 35,000 CD's is impressive and again, these units are to be considered moved. They need not sell since Kenwood is moving them, if you will. The operative idea here is that a major label should be able to instantly take notice and acknowledge that Kenwood has gotten behind AONN Records for an impressive 35,000 interactive CD-ROM singles to include ID3 tags with hyperlinks to a booming mp3.com page. That is clearly state-of-the-art and quite a substantial investment.

It seems like it's 1989 all over again. The feel is early urban, plus 80's dance/pop/rock. Our portfolio is phenomenal with gold and platinum artists signed to our round-1 financed company. The single song from our nationally to internationally distributed "AONN Records Presents: The November 12 Projekt" is BDS registered and has been playing on radio stations from Washington and Montana to Japan. Remarkably and what could also

and has been playing on radio stations from Washington and Montana to Japan. Remarkably and what could also be considered unprecedented are 5 versions of the song including a Montreal Quebec Remix. AONN has released a second CD XXXXXX. Both CD's are already being made available for XXXXXX so for stores, fans, and labels, we have taken all the official and necessary steps to make obtaining our product anywhere in the world, 24-hours a day, 365 days a year, in any quantity, a 21st Century, major record company level, automated, and ultimately seamless-click-of-a-button process. These systems and connections are not all available to just anyone especially artists at mp3. These established sources, methods, channels, systems and connections have cost our business considerable investments in terms of capital, time, and a tremendous 13 year long effort. We have fought to land a position beyond the minor circuit to the major circuit, and earned our rank as a cut above the rest. Also, Miller Genuine Draft/J. Walter Thompson contacted us through a licensing agent indicating their desire to use the November 12 Projekt single and cashed out AONN Records for a 30 day international television, radio, and internet campaign. Next, AONN received notification from the licensing community, which stated that AONN Records had proved itself worthy to the professional music licensing community as a whole. In addition, AONN Records has won so many other contests and as a product of such, is presently working with both legends and the newest brightest stars. If you wish to broker a multi-million dollar, multi-year, multi-album/video/movie deal, we do have a well-paid and reputable attorney XXXXXX, who has represented such artists XXXXXX. XXXXXX and I have periodically looked at options for acquisition for close to a year now and it seems that every conceivable facet of business is in order. We already have the attention of some major label A&R representatives who are familiar with our ascent and who are closely monitoring our company's progress to determine whether we are meeting our declared goals and quotas, which obviously we just did. AONN needed the corporate sponsored backing for 35,000 units and I believe that pushed our status over the threshold. In the Northwest and other parts of the country as well as world in general, we are already considered to be celebrities. Please also keep in mind, that some of our recently signed artists have had hit records, therefore those particular artists were obviously celebrities before joining our roster. Our portfolio is exceptional for a company moving into round-2 finance. This could be a really big thing for XXXXXX or whoever else and worth a lot of money. There isn't any other Washington State record company with the same amount of clout, save for XXXXXX and although we at AONN Records highly respect the company, it only caters to rock oriented genres. Ironically, our November 12 Projekt was nominated by S.A.M.I.E. (Seattle Area Musical Innovation and Excellence award council) for Best Multi-genres Album of the Year and was listed next to other nominees such as famous groups XXXXXX and XXXXXX that were listed in other categories.

AONN Catalog-Groundbreaking-Quick-3-Page Synopsis

Page1= AONN Presents New Album #2

Page 2/3= MTV/BET Video Shoot + Concert, Tour, Books, Movies, Major Label Certification, Top Investors, Political Campaign Highlights and More!

AONN has secured major-channel distribution via unprecedented multiple sources such as XXXXXX, XXXXXX, XXXXXX and XXXXXX with the latter for XXXXXX.

. During the last week of October, AONN will be recording a video in Vancouver British Columbia, Canada for MTV/BET and will be subsequently exposed to millions of new fans virtually overnight.

Brief Easy To Read Company Profile

In the past 6 months, AONN Records has appeared in countless advertisements and major media publications. The label has been round 1-financed, is now in round-2, works with platinum and gold musical artists, and will release Operation Northwest Nationwide in less than 30 days. Essentially, AONN Records took over major operations for a number of West Coast artist management collectives, labels, media agencies and publishing firms. Network operations for the aforementioned entities have been consolidated and moved to the Northwest High-Technology Corridor Region as the multimedia economy has shifted with Washington (State) as the industry focus and new global hub.

AONN is in production phase for new national to international satellite broadcast television music videos
XXX

Miller Genuine Draft J. Walter Thompson ad agency paid for licensing to use a single from the AONN Records Presents: The November 12 Projekt for a 30 day MGD.com, international television, radio, and internet campaign. Consequently, AONN Records was exposed to 20 U.S. markets, in effect, blanketing the entire United States. Canada. Puerto Rico. and other foreign territories.

States, Canada, Puerto Rico, and other foreign territories. Presently, AONN Records has songs playing on radio stations in countries as far away as Japan.

And Kenwood in partnership with mp3.com is manufactured to distribute 35,000 CD-ROM's, which were made available to Kenwood Stereo, Car Audio, and portable electronics buyers throughout the world. XXXXXX
XXXXXX

Thus, AONN has achieved international radio play, reaching an increased fan-base of millions. AONN recently signed XXXXXX and Canadian XXXXXX

Cheers,
Jessica Daniels/ Public Relations

- Financing Transactions
- Federal Funding
- Cash Management
- Minimum Funding Needs
- Operating Assistance for...
- Basic Capital
- Key Policy Decisions

(Partially Revealed Formula) How \$300,000 Can Return \$30 Million In 6 Months

...In the Hands of Information Professionals Who Possesses Special Connections and Abilities

These Figures Begin the Expenditures Breakdown for an Advanced National Album Release Support Staff

50 thousand units @ approximately \$50,000 w/tax = \$69,000. Take into account the possibility that this figure may be substantially lower (perhaps 50% lower) since the label has access to premium accounts.

Project release fee = \$10,000

Monthly support staff release fee = \$5,000 x 6 months = \$30,000

Escrow (security deposit) = \$100,000

Legal fee = \$100 per hour (Specific to time of closure)

Airfare (Standard International Major Label Artist Accommodation) -

Hotel

Ground transport

Advertising: Magazine/Newspaper/Radio x2/Television for 1 year = \$40,000

Sub-Total not including legal fees = \$249,000.

\$16.99 (approximate average retail price of each CD LP) x 50,000 units = \$849,000.

The \$849,000 above only expresses revenue generated by the sale of CD's and does not include other formats. The sell of other formats and other projects sold simultaneously along with the November 12 Projekt will each account for several million dollars in funds.

Monies from a myriad of related products; each product with several different formats

How many combinations? Let's do the math...each combination spawns a new product line worth over \$1 million

The important thing to remember is artists will have **CD's, cassettes, vinyl records, DVD's, and such, selling simultaneously**. At the same time, any given artist will be **selling several different projects**. So, to emphasize, for each major release, an artist will have

multiple formats

also various kinds of projects e.g. LP, EP, maxi-single, single ...in multiple formats

merchandise

touring, interviews, sponsorship, merchandise, etc.

The Amount of Money Made and Revealed is the Price of National/International Distribution

Every 10,000 units sold of any project for any format equates to approximately \$169,000 less the industry standard distribution fee of 35%. The average artist on our level with national (domestic) distribution sells approximately 250,000 units (debut), which equals an estimated \$4,247,500.

Again, this is **extraordinary because it does not include revenue generated from the sale of merchandise and other related products and services.**

A. Formula: 60,000 CD's sold at \$19.99 each = Approximately \$1,119,400 (See

Confidential Executive Business Summary) **...One only need sell roughly 60,000 units to bring back over \$1 million**

+

B. Other formats sold such that 60,000 cassettes = \$1Million ,

vinyl records \$1Million ,

DVD \$1Million ...other formats...\$1 Million for every 60,000 sold

Now, remember that was all from just one artist's individual album/project release...

Now, imagine that that artist is doing the same with another release at the same time as the first release...in other words, the artist releases a number of albums/projects simultaneously

Now, how many artists do we have doing this? See the math? Only in this industry and only a chosen few that have the much coveted and advanced secret formula...which typically takes 10 years to deduce

C. Shows (major venues live performances/Major Tours) = \$2.5 Million

D. Merchandising, which includes but is not limited to T-Shirts,

clothing/garments, videos DVD/(VHS), etc. Imagine being able to go back in time

to 1989 before the California Hip-Hop music explosion, to find the greats, before they became famous. Now, imagine discovering these

multi-platinum selling legends and then signing contracts with them before

the major record labels got to them. **Collectively, they have a total net**

worth of over \$1 Billion--easily. Most of the above-mentioned artists have

appeared in award winning videos and box office hit movies. It's 1989 all

over again, but in Washington, not California. **We own rights to the world's**

next greatest talent and have the largest A&R roster in the 5-State-Plus-1

Area: Washington, Oregon, Idaho, Montana, Northern California, and British

Columbia Canada.

Again, Formula Emphasis

Multiple-Projects-Formats-Selling-Simultaneously/Multiple Artists

E. Using the estimates from above, each artist can have multiple

projects/releases for sale on the market simultaneously,
generating

\$1Million for every 60,000 units sold for every format
available. Formats

also include **the newest and most advanced mediums of
music available**

regardless of how obscure. Example: Mini-disc

F. We also
offer advanced high-technology products and services as well as

**common
goods products and services via a secure international website/dot-com/webhosting division.**

**So far, that's \$1 Billion, light-years beyond the goal of \$30 Million from
\$300,000...there's more...**

We provide **24-hour on-site computer security, maintenance and repair.** The latter isn't really
offered
by

other companies anywhere. The **rate for 24-hour tech support begins at \$50**

per hour. A tech **support employee working 4 hours at \$50 an hour = \$200*6**
=

\$1,200*4

\$1,200*4 = \$4,800*11.5 = \$55,200*100 employees per region = \$5,520,000.

That's nearly \$6 Million added to the pot for 1 year of computer tech support

There's more...

We have not included revenues generated by the sale of hardware components,

tutoring, or consulting. Furthermore, we have not included the sale of

advertising.

G. As for the sale of musical products and managerial services,

AONN Records/Access One Network Northwest works with ALL Quality genres of music.

AONN Records markets semi-national to international artists in the genres

and sub-genres of Adult Contemporary, Blues, Jazz, Classical, Rock, Pop,

Cover, Alternative, Folk, Dance, Country and Top 40/DJ.

We currently work with artists who have reached both gold and multi-platinum

selling status. Example: Sponsor Reps agent working with unnamed (Grammy award winning producer of the year-produced hits by XXX XXX, XXX XXX, and XXX XXX) latest discovery, XXX XXX as well as many others. **So, unlike most record labels that specialize in a few**

genres of music, we, like Sony Music, work with all of them. For

the record, we are also MP3.com Business Affiliates and ASCAP (American Society of

Composers Authors and Publishers) Members/Publishers. **AONN will have top**

artists in the various genres selling multiple projects simultaneously with

each project generating millions of dollars. We will be able to create such

a substantial amount of capital, largely due to the fact that [TRADESECRET] **we arrange top artists**

appearing on our feature compilation albums, in a certain formulaic fashion.

[TRADESECRET] "Powerful, oftentimes, "high energy" music is also arranged in a particular

formulaic manner. We do not prefer to use the term "band" in any of our literature,

for, as we refer to musicians as artists. We do nothing on the minor "circuit" and

work only with major labels.

Examples of Megamillion Dollar Operations that Offered Less

H. XXX XXX.com (the 'X' convention does not mean pornography) an ice cream and movie home/business delivery e-business,

initially raised roughly \$2X.X Million in Venture Capital; X (number of) youth/ young adults from XXX, XXX who had a talent for selling CD's regionally, **were given a history-making \$X0 Million by XXX XXX to sign** with the label and subsequently release rap albums. That particular group has **gone on to become one of the top-selling groups of all time.**

Even if Mainstream isn't one's forte, it's a global multi-billion dollar industry and it ought to be bought in to.

It's been said that one of the more notable mainstream California artists, alone, has a personal net worth of well over \$200 Million.

If people who began this business with very little resources were successful, we who began with a little more information and resources, can be even more successful.

I. Demographics: **Since we are an IT/Multimedia/Arts & Entertainment/Conglomerate and government corporation with an index of products and services from A-Z, we are capable of meeting any conceivable demographic segment.**

We target a multi-racial population comprised of children, adults and

seniors equally

female and male, worldwide. We provide a very unique,

Universal System that allows us to market any known product or service.

We project that we will earn US \$30 Million in the first year, US \$50 Million

in the second year, and are seeking approximately \$100 Million in funds for this phase of the operation. Note: The aforementioned projections are low estimates.

IPO WITHIN 3 MONTHS

Corporate Info

Dun &
Bradstreet D-U-N-S Number: XX-XXX-XXXX

1. Hypothetical Partnership Scenarios to Involve Corporate America – Consider that in addition to AONN Records, a new corporation will be set up. The fund raiser will not be held

personally liable for any debts incurred by the corporation.

2. Stock will be issued in the corporation. The fund raiser can maintain an

equal interest (50 percent) in the corporations stock.

3. Four-fifths of the investors' financial contribution to the corporation's

stock will be treated as a loan. Technically, the fund raiser will not have

to begin paying back the loan, plus interest (the lowest interest rate

allowed by the state), until two calendar years from the start of the

business have elapsed. It has been noted for the record that returns to

investors could theoretically begin as soon as the first CD (unit) sells (roughly 3 weeks after payment for manufacturing), however, it generally takes approximately 6-8 months to receive first substantial royalties.

4. The remaining one-fifth of the investors' financial contribution will be

treated as equity in the corporation. Depending on the size of the

investment, the investor may be entitled to as little as 5 percent or as

much as 49 percent of the business. **For a 49 percent interest, however, the**

investor should be contributing at least an eight-figure sum to the

corporation.

5. The fund raiser might be an officer of the corporation.

6. The investor may be invited to join the board of directors of the

corporation.

7. The investor might have the right to view the corporation's financial

records

during normal working hours so long as the investor is granted access by national security officials.

How About a Tour & Vacation to the Pacific Ocean...Then, Another Tour for Your Country...

Work with a major West Coast record company/ major West Coast multimedia company? Need some fun and excitement in your

life and something a little upscale for a change? You currently have the

opportunity. Arts & Entertainment/ Information Technologies/ Multimedia

Experience/ Government & Politics may be just what you need to come up in the world.

AONN has been featured in major Washington State newspapers

Approximately 19 times in the past 10 months.

Artists on the AONN Records roster have had an unprecedented amount of internet "hits"

ranking highest on online charts in the Pacific Northwest as well as on the main West Coast and national to international charts.

AONN offers legal

referral through our Arts &

Entertainment attorneys, some of whom have worked

with such groups as

XXX. The AONN Records extensive A&R caters to all quality genres

of music as The Network

manages numerous paid live performance nights at several high

profile,

XXX XXX, premier clubs, casinos, and establishments. In fact, AONN Records A&R is comprised of groups

that were selected for the XXX XXX. AONN artists are in the line-up for other events at major venues, new

video

shoots, and major record releases.

More Bite of XXX Coverage – Friday XXX, XXX, AONN Records successfully placed (selected from among approximately 150 groups) XXX (XXX XXX XXX

XXX

XXX/XXX XXX), a hit XXX music group, to perform on the XXX stage. This was a world class event, therefore AONN Records

received

national to international media coverage. AONN Records operates an

extremely

reputable business entity that has publicly been in existence for well over

six years both with and without the public's knowledge of the company's connection to the intelligence community.

The Network created what came to be known as the "Dot-com

Federation." Leading-edge college, university level staff, and both

government and private sector scientists are the catalysts behind this

program. There was an overwhelming response by interested corporate industry parties to the

posted worldwide web advertised AONN Recruitment Campaign. Moreover, it's fair to say that the AONN Records business plan had attracted a tremendous amount of attention.

Participants are to receive personalized advertising for a period of

one year via AT&T Digital Cable/Satellite Television, print, and other media. Participants

meeting certain criteria, will gain access to a wide range of technology,

highly skilled personnel and other high level resources to include

television and many VIP, behind the scenes opportunities.

XXX XXX, a XXX artist who appears on the AONN Records Presents: The November 12 Projekt was XXX showcased XXX

on XXX

(BDS credited) prior to national radio pickup as a result of AONN agency negotiations, and other artists appear on XXX XXX

XXX XXX/XXX XXX, which features famous Hollywood and industry celebrities every week. XXX is

sponsored by major records labels, regional businesses, and now, international corporations.

Subsequent to

account verification, manufacturing takes approximately 3

weeks before product can be shipped to stores. **These types of investments have exponential returns because The Network is**

dealing with popular/mainstream music, extremely complex, high level technologies, and high-budget, full-feature movies.

Personnel can be

reached between the hours of 9 am to 5 pm (XXX) at either of the following

XXX XXX extensions: (XXX) XXX-XXXX or Fax (XXX) XXX-XXXX XXXX;

24-hour info. (tech) (XXX);

Thank you.

Respectfully Yours,

CIO Robert L. Taylor III/ IT Analyst

AONN/Access One Network Northwest

DSI/N is a relatively new agency in the midst of groundbreaking, international business achievement, highly notable political campaign activities, beyond quantum advanced electronic/IT (Information Technologies), human behavior, computer, scientific and monumental social discoveries.

Defense Strategic Overview/Abstract of Multilateral DSI

AONN U.S. Defense Security Intelligence Network is an Equal Opportunity Employer (EOE)

Intelligence Operation EPIC REPUBLIC/ EPIC NATIONS:

(Subject) Information/Cyber Warfare Joint-Counterstrike Force

(Operation/Project Code name) "EPIC REPUBLIC/ EPIC NATIONS"

(Official Project Title) "Union Alliance Collective Security-Redemption Agreement 2002/2003"

(Degree of Interoperability/Scale) Multi-Agency

(Brief/Synopsis) The creation of a new government agency/ special federal independent service (SFIS)/ private sector intelligence network governed ultimately by Congress as authorized by Public Law and United States Code (U.S.C.). **A new U.S. national intelligence organization of this type will be shared equally by both civilian specialists and DOD/ Department of Defense military personnel.** The preceding shall be in accordance with DoD Directive 1400.35, "Defense Civilian Intelligence Personnel System (DCIPS)", 03/19/1999, which is responsible for the establishment of the Defense Civilian Intelligence Board (DCIB). Information accrued by the proposed agency is strictly disseminated among eligible Federal, Independent, City, State, and Local networks as well as specified foreign government alliances.

Location: Puget Sound Region/ Washington State/ Pacific Coastal Zone/ Pacific Rim Theater-Global

Security Level: Special Access Restricted

The following contains a brief technical abstract of the special access project and a discussion of anticipated benefits and civilian/military applications. Note: No proprietary or classified information is contained herein, however the underlying nature of this program is of the highest classification on many levels.

Brief: (From Page 3) Identification and

Significance of the Problem-

Current logistics findings

indicate that the United States Critical Information Infrastructure in the next 5

years lacks reasonable survivability without the advent of a

civilian and military combined effort to counter

information/cyber warfare aimed at North

America. The sale of AONN products and services, emphasizing the sale of urban audio entertainment products, in other words, CDs and other associated multi-genres releases, as well as gathered intelligence will help to finance the Information/Cyber warfare Joint-Counterstrike

Force. Hereinafter, the aforementioned center/ complex/ facility and related multi-agency shall be referred to in acronym form as ICW/JCF. The codename for such is (1) THE MONASTERY

Subject (Reiteration): Create a new, national, consolidated, intelligence architecture. This new government multi-agency/private sector intelligence echelon is in accordance with and governed ultimately by Congress

as authorized by Public Law and United States Code (U.S.C.). A

special independent agency of this type will be shared equally

by both civilian specialists and DOD/Department of

Defense military personnel. The preceding shall be in accordance with DoD Directive 1400.35, "Defense Civilian Intelligence Personnel System (DCIPS)", 03/19/1999, which is responsible for the establishment of the Defense Civilian Intelligence Board (DCIB). Information obtained by the proposed agency is strictly disseminated among eligible Federal, Independent, City, State, and Local networks as well as specified foreign government alliances.

Purpose: To identify rapidly emerging

methodologies of

information/cyber warfare targeting the United

States and its allies as related to

national/international security, and subsequently

implement countermeasures. Interpret and define

so-called "gray-areas" (example computer laws) while enforcing international

law. This program will create liaison between

civilian and non-civilian intelligence community

members and allow for the instantaneous exchange of

ever increasing cyber-warfare data in the

private, commercial, and government sectors, thus

strengthening U.S. security infrastructure. Furthermore, said liaison will increase

HUMINT productivity in such areas as Urban Intelligence.

Job Requirements: A minimum of 4 years

military experience, university graduate-level

computer science w/mathematics and natural/physical sciences

emphases, or equivalent; a 3.5 GPA and

graduate-level English proficiency (excellent

analytical, written, and oral communication skills are

necessary. Relevant overseas travel and foreign

language capability are desired, but are not

required. U.S. citizenship is required, as is

successful completion of a medical evaluation,

polygraph interview, and an extensive background

investigation.

This program offers the ultimate in commercialization features. U.S. domestic computer security is enhanced by approximately 30% in effect, changing global flow and shifting current world paradigm

Due to the nature and sensitivity issues of related information sources and methods as outlined, some data have been restricted. Public sector applicability is contingent upon congressional legislation.

Related Functions: Counter-Intelligence (CI)/Counter-Terrorism (CT), Research and

Development, Cooperative Training, Breakthrough

Science & Technology Integration, Advanced

Technology Finding, Discovery Navigation, and

C⁴ISR (Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance).

Costs Breakdown: 1) Property [Facility/Complex] 2) Security Personnel 3) Legal Counsel 4) Lexicographers 5) Analysts 6) Computer Scientists 7) Official Council 8) Other

Copyrights-Patents-Technical Data Rights

Notification of proposal receipt and information
on proposal status-

Signatures-(Corporate Official/Official of
Research Institution)

Signing parties certify that AONN Systems/Access
One Network Northwest will exercise management
direction and control of the performance of the
Technology Transfer Award and that the research
institution is a contractor-operated Federally funded

facility and development center. Additionally, signing officials certify that (a) Facility is free from organizational conflicts of interest relative to program; (b) Privileged information has not been gained through work performed for proposing agency or private access to agency personal in the proposal of this technology transfer proposal; and (c) Used outside peer review as appropriate, to evaluate the proposed project and its performance therein.

In addition to the 7 Primary Functions as indicated, revenues are generated through management of:

- A) Publications to the extent of Declassified as well as Classified reports and analyses
- B) Highly Advanced Satellite Telecommunications Technologies
- C) Computer Information Security Software; Next Level Information Assurance Architecture
- D) Broad-Range Security Systems
- D) Advanced Defense Weapon Systems (i.e. Kinetic Weapons, both lethal and non-lethal, E) Special Operations [PsyOps], Threat Reduction Methodologies, etc.)
- F) Artificial Intelligence (AI)
- G) Nano-Technologies
- H) Bio-Medical Technologies
- I) Data Systems Streamlining

The 7 Primary AONN Systems Functions are:

- 1.) National Security Consulting, Risk and Threat Assessment i.e. Information Security (InfoSec);
- 2.) Science and Technology/Defense Advanced Research and Development (R&D);
- 3.) Intelligence Studies i.e. Counter-Terrorism and Cryptologic Systems;
- 4.) Japanese and Portuguese Foreign Business Language Interpretation and Analysis;
- 5.) Criminal Investigative Services: Data Forensics (Recovery), Background Checks, Skip Tracing, and Political Liaison (All Branches of Government e.g. City, State, and Federal);
- 6.) Domestic Multimedia Audio/Video Engineering, Production, Publishing, and Distribution; and
- 7.) 24-hour Computer Technical Support Assistance, Consulting, Repair, and Emergency Response. Note - Extended Service Contracts Available Upon Request.

Government Wide Accounting Procedures: AONN Defense Financial Systems are such that revenues from the sale of goods and services are accounted for in the same way that they are in AONN's Multimedia Division. Business is conducted on a project-by-project basis. The cost by which our outgoing technology and data is structured, depends upon many factors. Typically an array of \$10 million satellites for example, could easily resell for cost plus 35% more or whatever is deemed appropriate per sponsoring agency, industry, policy, or security protocol. Therefore, AONN Systems is in a key position to manage an annual budget consisting of several billions of dollars.

Sent: Monday, September 23, 2002 9:20 PM

Subject: AONN DSI University of Washington Cyber Security Foundation

Re:

FY 2002/ 2003 (AONN DSI/N)

U.S. Defense Security Intelligence Network Congressional Budget Request

AONN DSI University of Washington Cyber Defense Security Foundation

Dear University of Washington Foundation Staff,

Our service has officially begun the process to create a foundation/ endowment fund with which both the university and DSI/N would operate an account for the purpose of cyber security and defense. DSI/N is a federal service so it is naturally required that the IRS be contacted in order to better understand the university's 501c3 status in relation to our tax status in relation to proper guidelines for disbursement of funds. DSI/N will share the total fund at fifty percent for the life of the cyber defense security foundation. The University of Washington will have the ability to use the university's half of the cyber security funds at the university's discretion. The DSI/N portion will be allocated to DSI/N for the purpose of cyber security functions in accordance with federal law and U.S. Department of Treasury guidelines i.e., making/ granting our own endowments at the University of Washington (if possible) and elsewhere aside from the University of Washington's spending of funds and specific financial decisions with regard to use of funds; The UW may decide to make a percentage of an endowment with its half of the funds versus DSI/N, which may decide to participate in the endowment but at a separate percentage. Perhaps one of the parties may wish to not participate in a particular endowment, project, ceremony, recruitment program, increased DOD hiring, divestment, etc., for reasons of other such activity interest, whereas, the other party actively participates in one or more of the aforementioned functions/ events. This arrangement creates total flexibility for the partnership/ program/ foundation/ ongoing endowment/ fund. Following preliminary talks, further evaluation by our analysts suggested that this particular foundation ought to be a public foundation. It may however come to light that perhaps a combination of foundation types is the ideal platform for this effort, or that a private foundation is better for our special situation.

In addition to our official FY2003 Congressional Budget Call for \$50 M, our service will actively recruit philanthropists, donors, grant-givers, and the like. DSI/N has already partnered with XXXXXX, XXXXXX, XXXXXX, XXXXXX, XXXXXX, current military/ intelligence officers, and a myriad of businesses, government and non-government institutions and organizations, etc.

DSI/N comptrollers will need to discuss with university foundation staff how DSI/N portion of security funds are to be interagency/ institutionally transferred. There has been some stipulation as to this, however, given the special circumstances, perhaps IRS can make special arrangements through the Department of Defense (DOD)/ Department of Treasury. IRS contacts/ suggested POC's (suggested points of contact) at IRS and advisory of this shall be the decision of the university.

It could be that the university is technically able to endow DSI/N with DSI/N's share of the funds, rather than hold to the notion that the university would not in the traditional way (as a result of 501c3 status), be able to pay DSI/N for DSI/N's service of obtaining funds to the university foundation account. There is a solution to the funds transfer clause. As suggested earlier today by foundation staff, DSI/N could serve as the "pay through" for third parties making endowments, but DSI/N would prefer that there be some solution to the extent that the university foundation comptroller is able to make a payment "for expense" (or however this works out after final analysis) to the accountability with AONN DSI U.S. Bank/ U.S. Treasury.

Financiers, Philanthropists, Grant Givers, Organizations and Corporations can fund the project by making bank notes and/or monies payable to:

AONN U.S. Defense Security Intelligence Service

In the "For" field indicate: **University of Washington/ Cyber DSI Partnership,**

or, if not for UW Cyber DSI Endowment, then specify **other program, project or agenda**

If you are a partnering sponsor and/or sponsor agency/organization, when U.S. DSI/N has received funds on your behalf, The Network is mandated to gather from you, further information for tax filing purposes.

Thank you for your most positive reception and our service looks forward to a tremendously fruitful and long-lasting relationship with the University of Washington. AONN DSI appreciates the wonderful staff at the Executive Office at the Office of Development/ University of Washington Foundation.

At the core of the AONN U.S. Defense Security Intelligence Network Service mission is our unrelenting responsibility to hire only the best and most qualified -- most talented and most brilliant -- thinking-way-outside-the-box -- new breed advanced -- defenders of cyberspace and United States/ international infrastructure.

Sincerely,

Jessica Daniels
AONN Public Affairs/
Administration Operations

Thank you

30 August 2002

All Select Components Memorandum

“Undeniably the most successful cooperative intelligence operation in world history...”

Su: Treatise of Compromise 2002

Multilateral Defense Security Intelligence

Project/Operation: Epic Nations – Global Alliance

Dear Organization,

The AONN DSI/N would like to transmit a proposal, which contains information regarding a multi-agency counterintelligence/counterterrorism program headquartered deep within the thick greenery and mountainous terrain of the Pacific Northwest. In seamless compliance with the XXXXXXOffice of Financial Management/XXX of Governor, XXX municipal government engineering and a quite reputable, Class-A property management firm, we have settled on a location for the new DSI Cyber Security Center/Facility/Complex. The service is requesting assistance and to begin with, would like for XXXXXX to be an ally in the joint effort.

Advanced Counterintelligence Command Structure

Special Independent Agency – Defense Security Intelligence Service

Command Structure – Top Tier Tables of Organization

AONN Congressional Affairs/ Historical Facts Committee

Chairman Ret. Lieutenant Commander Robert A. Davidson (Crypto Board U.S. Navy) – Previously Commanding Officer of Reserve Unit Spokane, Washington (Assigned to AONN DSI/N panel on 9 Aug. 2002 Friday). [Contact](#)

AONN Military Intelligence/ AONN Liaison to the Office of National Counterintelligence Executive

Former Major Robert A. Heber (U.S. Army) – CIA Special Operations Group (DDO/SOG) – Served as an Intelligence Officer with the Central Intelligence Agency within the Directorate of Operations [Contact](#)

AONN Computer Information Security Chief Arlo Logozzo (Computer Information Systems Specialist) – Clandestine Operations and Special Projects [Contact](#)

AONN Public Affairs Officer Jessica M. Daniels – Defense Staffing & Finance -- Information Directorate/Administration [Contact](#)

A multi-agency defense security intelligence service has been put in place to create a multibillion-dollar boost to the overall economy to help our country and allies win in the worldwide war against terrorism. AONN DSI is this entity. In conjunction, DSI/N will request \$50 million from Congress to hire more DOD staff, specialists, support personnel from other agencies and to purchase additional computer, information and communications equipment from NSA. In cooperation with the Department of Justice's Bureau of Justice Assistance, DSI/N will contribute to this special program by accessing AONN DSI sources to procure a guaranteed contract for \$2 million in U.S. funds. This is a 2-phase process, which will provide all agencies involved, access to highly lucrative markets rather than the small percentage of stock commodities as in the case of other government corporation models. The best example of the highly lucrative markets to which we have referred is CIA's In-Q-Tel. In-Q-Tel is impressive and a top innovation, which serves as an ideal model of a platform for government business. In-Q-Tel's platform can be operated by government to stay years ahead of the competition in the multi-faceted, global, multi-dimensional challenge with which we are all faced. Clearly, this kind of advanced model surpasses by light years and is quite opposite from, the statistically small financial returns generated by outdated government corporation business models. These essential profits generated by such government corporations are absolutely vital to the national security.

History of “the Network”

Through Harvard University Innovations In American Government circa January 14, 2002, we officially created a new, beyond state of the art, U.S. national defense system.

AONN DSI had been conceived almost sixteen years prior, but was held over until public disclosure 17 May 2002 at Harvard University John F. Kennedy School of Government. Working closely with the Department of Defense as a trading partner, in August 2002 the Pentagon acknowledged AONN DSI existence as a “Special Independent Agency.” In July of 2002 the service had applied for upgraded agency status to executive level.

If your organization is interested in getting involved and making an endowment, please have your comptroller contact administration through our public affairs U.S. West Coast channel Tel. 425.350.2778 / 206.666.8078. Thank you.

Subject: All Select Components Memorandum

CC: Commander XXXXXX

Dear Mr. XXX,

You may want to pass this around the office. Our national intelligence organization has communicated with the President's Special Board for Cyber Security/ Critical Infrastructure Protection Board, National Security Council and congressional leaders regarding AONN DSI/N's status, as DSI/N was a most sensitive project prior to 9/11. As you know, DSI/N is not in space-time in any way remotely characteristic of post 9/11 bandwagon jumpers and that our leadership council abhors and despises such. Our charter is available online and was submitted to and approved by both NIST and the Department of Commerce as well as many other agencies. The way things look, XXXXXX may be our primary partner. Logistically, and with no pun intended, XXXXXX logically provides a perfect shroud of secrecy and ideal cover. Most would never suspect a XXXXXX outfit as a cloak for the greatest U.S. cooperative intel operation in history. Next to NSA, XXXXXX is a pinnacle source of numbers analysis.

DSI/N needs this kind of companionship environment. The Network exists wherever known numbers exist and positions itself to first identify the unknown ones. Furthermore, the two entities can do a lot for each other.

At least one individual at nearly every known and unknown defense security intelligence network on Earth knows about our formation and Cyber Security Red Team mobilization. On the other hand, there are many entities that still do not know of our existence. It's fair to say: "Covert Ops" would be a gross understatement. The entire Senate Select Committee on Intel has long had this knowledge. Furthermore, DOD has informed our command structure that NMCC will provide oversight and advise in respect to the DSI/N's HUMINT operations, ongoing recruitment of spies, assets and top cadre of hackers. DSI/N's law enforcement arm operates counterintelligence systems, counterespionage, counter narcotics, and counterterrorism units. Consequently, our administration acted upon the aforementioned DOD gesture by ASD/OSD, proceeded with our special federal independent service's mission as indicated and became involved in the world of intelligence on an unprecedented level.

The Defense Security Intelligence Network and database consist of approximately XXXXXX foreign and domestic sources. DSI/N's all-text website is an ingenious concept, which provides a most sought after layer of mass secrecy and counterintelligence never before achieved by anyone. Our service is the first, and The Network has received anomalous recognition throughout the world of foreign allies and friendly intelligence services. **The DSI/N collective "energy" has taken the lead on major issues affecting U.S. national security. We have become, in a sense, master agents of influence in the way of U.S. foreign and domestic policy as DSI/N is able to operate outside established Agency guidelines. The Network, in the greatest way imaginable, it has been discovered, complements CIA design. So perhaps it is The Agency that will be The Network's primary partner.**

Extraordinarily, our scientists and analysts created and then deployed an overt/covert anti-crime and psychological (PsyOp) military operation, which transforms XXXXXX (elements) into controllable entities. Who else could have possibly pulled this off? As such, DSI/N was commissioned by DOD and are in fact officially and legally working for the Pentagon -- accomplishing profoundly incredible feats in regard to the creation, architecture and implementation of multilateral defense security intelligence systems e.g., negotiation, communications, inspiration, guidance and leadership. In essence, AONN DSI has the "juice" and was what everyone was looking for and trying to accomplish, so to speak. DSI/N is able to do things as a unique entity that could never be done before and that would be considered outside other agencies' guidelines. As you are well aware, AONN U.S. Defense Security Intelligence Network clearly consists of active DOD personnel working at Above TS levels. Therefore, DSI/N has made every effort to communicate its every move to ASD/OSD/C3I channels. Invariably, AONN maintains rapport either directly and/or indirectly with every conceivable DSI network i.e., CIA, DIA, FBI, NSA, and so forth. And to some, it is no secret that the multimedia conglomerate side of AONN is the front end. Yet, this has been nothing but positive press for the Department of Defense, our larger Community,

and has not been harmful as was Air America, Bell Helicopters and other such public inquiries. How could that be possible? No negative press even in spite of AONN Records (thought of by some [though not true -- really multimedia in general] as a primarily urban and mainstream music recording business) being an intelligence service's commercial business front. AONN DSI waited very patiently and strategically for public opinion of the Community to be transformed, become positive and for U.S. intelligence interests. The media, special interests and PsyOps had a lot to do with this. In an amazing way, DSI/N has its pulse on the nation unlike others. The public as a whole loves the super genius overt/ covert U.S. Defense Security Intelligence Network/ Service/ AONN DSI/ AONN Records operation/ campaign and will "listen" to and agree with U.S. intelligence interests as never before in world history. Compelling evidence demonstrates that a majority of people in America and elsewhere actually now "love" the secret shadowy spy agency theme, which clearly was not previously the case -- even our worst enemies admire our dark DSI theme and exclusive culture of mega-clandestinity. DSI/N knew how to maneuver the entire system of national security and take it to a level that some White House staff and components are only now talking about doing themselves. The fact that DSI continues to be one or more steps ahead of even some at the White House/ Homeland Security and other ultra secret agencies, which house below-ground, nearly impenetrable "safes" and other such compartments containing the most classified information, has shocked the whole intelligence community -- analysts are baffled by AONN DSI's mighty moves. People are cheering for DSI/N and changing their minds about government and security. Officials and the masses are applauding DSI/N's out-of-this-world efforts. Members of Congress have offered full support. AONN DSI/N is a super formula comprised of geniuses, some of who until recently, were unknown and/or overlooked (for extraordinary reasons) to/by the Community. AONN DSI has achieved what no other spy organization ever has -- AONN DSI has in many respects paralleled OSS, but went a direction that CIA legally could not. This was astonishingly done in favor of CIA and in fact, to pay homage to the Agency. DSI/N applauds the CIA as its greatest influence, inspiration and guiding light. AONN all the while had the CIA in mind as positive, versus negative public opinion of the Agency that has long existed. DSI/N in secrecy and on its own championed a cause to change the way opponents abroad and at home, think about U.S. intelligence services. Therefore, a special team of profoundly gifted scientists embarked upon a ten year long quest to make this a reality. Many of these scientists lived double, triple, and even more than quadruple lives to avoid persecution as a result of their giftedness. More stunning is that some of the prodigies were ex-underworld operators and formerly held anti-establishment ideologies, but were transformed into the greatest of patriots as a result of the "indoctrination experience." AONN DSI connected to CIA alumni and formed an incredible network bond that is almost unbelievable. Similar to other such cases observed all throughout history, people couldn't believe how AONN DSI came out of nowhere and became a new premier intelligence service, thereby taking the ancient craft of intelligence to the next level. AONN DSI created/ promulgated/ mitigated a paranormal formula-event-system that persuades targeted foreign and domestic enemies, detractors and opponents to willingly hand over secrets, information, data, intelligence and align with us -- the United States. How is that possible? DSI/N is an asset and amazing system that is crucial to the

future and present U.S. national-international security. There *are* Beautiful Minds among us and ones that do work for government.

The most incredible energy and vision since (R.I.P.) ...Nathan Hale
